Phase II (Small) MS4 Annual Report Form

TPDES General Permit Number TXR040000

A. General Information

Authorization Number: TXR040**368**

Reporting Year (year will be either 1, 2, 3, 4, or 5): 2

Annual Reporting Year Option Selected by MS4:

Calendar Year: 2021

Permit Year: 2022

Fiscal Year: 2021-2022 Last day of fiscal year: (09/30/2021)

Reporting period beginning date: (month/date/year) 01/24/2021

Reporting period end date: (month/date/year) 01/23/2022

MS4 Operator Level: Phase II Name of MS4: City of Texarkana

Contact Name: Amanda Freeland Telephone Number: 903-798-3948

Mailing Address: PO Box 1967, Texarkana, Texas 75504-1967/ 220 Texas Blvd, Texarkana, Texas 75501

E-mail Address: amanda.freeland@txkusa.org

A copy of the annual report was submitted to the TCEQ Region: YES **X** NO

Region the annual report was submitted to: TCEQ Region **5**

B. Status of Compliance with the MS4 GP and SWMP

1. Provide information on the status of complying with permit conditions: (TXR040000 Part IV.B.2)

	Yes	No	Explain
Permittee is currently in compliance with the SWMP as submitted to and approved by the TCEQ.	X		Yes, the City collects all Stormwater required documentation prior to the SW Permit being issued.

Permittee is currently in compliance with recordkeeping and reporting requirements.	X		Mostly, still due to our cyberattack we have lost several documents.
Permittee meets the eligibility requirements of the permit (e.g., TMDL requirements, Edwards Aquifer limitations, compliance history, etc.).	X		Yes, all Permits have been logged and are attached.
Permittee conducted an annual review of its SWMP in conjunction with preparation of the annual report	X		Yes, all documents are retained throughout the year for the annual report. Documentation is reviewed prior to completing annual report.

2. Provide a general assessment of the appropriateness of the selected BMPs. You may use the table below to meet this requirement (**see Example 1 in instructions**):

MCM(s)	BMP	BMP is appropriate for reducing the discharge of pollutants in stormwater (Answer Yes or No and explain)
Yearly Facility Inspections	Yearly listed City Buildings/ Facilities and City Parks.	No, due to cyberattack (losing facility 5-yr schedule). We are still recreated most of our documents. 2022 year will consist of extra facility Inspections.
Pollution Prevention & Good Housekeeping for Municipal Operations	Parks, Public Works Departments, along with the Water Department have continuing education on detecting stormwater issues.	Yes, each employee of listed Departments are educated at quarterly meetings on what they are needing to look for in the field. This is for detected outfalls as well as discharges. Also, looking grass clippings in Roadway.
Illicit Discharge Detection and Elimination	Routine Visual Inspections and by Outfall Mapping.	Yes, Visual Inspection are preformed routinely by our trained staff. Which by which has decreased illicit discharge

Construction Site Control and Post-Construction Site Control	Inspecting Construction sites during all stages of progress, to ensure all sites are following both State and Local rules and/ or Ordinances.	Yes, by Inspecting periodically has helped reduce any runoffs or discharge into our storm drains that flow to our creeks.

3. Describe progress towards achieving the goal of reducing the discharge of pollutants to the MEP. If no progress was made or the BMP did not result in a reduction in pollutants, provide an explanation. Use the table below to meet this requirement (**see Example 2 in instructions**):

MCM	BMP	Information Used	Quantity	Units	Does the BMP Demonstrate a Direct Reduction in Pollutants? (Answer Yes or No and explain)
1	Public Education	Utility Bill Message (2-month Cycle-Long)	Over 20,000	Message On Water Bill	No, it does not directly reduce pollutants. But educating our community over time will reduce the pollutants overtime.
2	Dry Weather Screening	Outfalls	5	Visual Inspections	Yes, this directly impacts the reduction in pollutants to our creeks.
3	Construction Site Inspection	Construction Sites	26	Inspections	Yes, by Inspection the process at each site it reduces any discharge from escaping through the proper use of BMPs.

4	Construction Plan Review	Plans	31	Reviewing (construction of any new sites)	Yes, this ensures that the proper BMPs are being utilized to prevent any discharge.
5	Public Education	Community Cleanups and/ or event (3 events)	150	Bookmarks and Pamphlets	No, it does not directly reduce pollutants. But educating our community over time will reduce the pollutants overtime.

4. Provide the measurable goals for each of the MCMs, and an evaluation of the success of the implementation of the measurable goals (**see Example 3 in instructions):**

MCM(s)	**Measurable Goal(s)**	**Explain progress toward goal or how goal was achieved. If goal was not accomplished, please explain.**
1	Provide utility bill inserts to each utility customer at least once each year	Met Goal-We had our local Water Utility Department run a message on all City Residents water bill for 2 months.
2	Conduct one public meeting or city-wide cleanup day each year	Exceeded Goal-We had 2 Citywide cleanups in the Spring of 2021. Both were a great success even during this pandemic.
3	Map 25% of outfalls and 50% of receiving waters during Year 1 (same as milestone)	Met Goal-Our Public Works employees have continuously made routine Inspections and cleaned up needed areas. (Even with a shortage in staff, due to pandemic)
4	Perform site inspections on 25% of all active construction sites	Exceed Goal-Each Construction Site is Inspected periodically throughout the full construction process.

5	Respond to 100% of construction complaints received	Meet Goal-Every complaint is Inspected and handled immediately. A follow up to ensure complainant has complied with needed corrections.
6	Review all site plans submitted for new development projects	Meet Goal-Every Project is Inspected prior to any Permit or construction beginning on all projects.
7	Sweep 50% of roads each year	Exceeded Goal-Our City is divided into 8 Areas with a schedule for alternating through out the City Limits. With additional sweeping as seen or called in.
8	Send two employees each year to a stormwater training workshop	Did not Meet Goal-Staffing shortage due to pandemic and turnover has caused short staffing and lack of ability to go off to continuing education.
9	Inspect 5 industrial facilities	Did not Meet Goal-Due to cyberattack we do not have an accurate list for Inspection. We will conduct double Inspections for 2022.

C. Stormwater Data Summary

Provide a summary of all information used, including any lab results (if sampling was conducted) to assess the success of the SWMP at reducing the discharge of pollutants to the MEP. For example, did the MS4 conduct visual inspections, clean the inlets, look for illicit discharge, clean streets, look for flow during dry weather, etc.?

D. Impaired Waterbodies

1. Identify whether an impaired water within the permitted area was added to the latest EPA-approved 303(d) list or the Texas Integrated Report of Surface Water Quality for CWA Sections 305(b) and 303(d). List any newly-identified impaired waters below by including the name of the water body and the cause of impairment.

- In the 2016 Draft Texas Integrated Report adopted October of 2018, Wagner Creek which is located within the City Limits of Texarkana, Texas was added under 5C for Bacteria (Recreational Use)

2. If applicable, explain below any activities taken to address the discharge to impaired waterbodies, including any sampling results and a summary of the small MS4's BMPs used to address the pollutant of concern.

   - The City of Texarkana does not have further data available on the impact of Wagner Creek. The City has continued to monitor the issues and to prevent any further issues. The Stormwater Management Plan (without any specific BPM use) is being used to ensure no further issues arise.

3. Describe the implementation of targeted controls if the small MS4 discharges to an impaired water body with an approved TMDL.

   - No targeted controls have been used at this time.

4. Report the benchmark identified by the MS4 and assessment activities:

Benchmark Parameter ***(Ex: Total Suspended Solids)***	**Benchmark Value**	**Description of additional sampling or other assessment activities**	**Year(s) conducted**
NOT APPLICABLE			

5. Provide an analysis of how the selected BMPs will be effective in contributing to achieving the benchmark:

Benchmark Parameter	**Selected BMP**	**Contribution to achieving Benchmark**

NOT APPLICABLE		

6. If applicable, report on focused BMPs to address impairment for bacteria:

Description of bacteria-focused BMP	**Comments/Discussion**
NOT APPLICABLE	

7. Assess the progress to determine BMP's effectiveness in achieving the benchmark.

For example, the MS4 may use the following benchmark indicators:

- number of sources identified or eliminated;
- number of illegal dumpings;
- increase in illegal dumping reported;
- number of educational opportunities conducted;
- reductions in sanitary sewer flows (SSOs); /or
- increase in illegal discharge detection through dry screening.

Benchmark Indicator	**Description/Comments**
NOT APPLICABLE	

E. Stormwater Activities

Describe activities planned for the next reporting year:

MCM(s)	BMP	Stormwater Activity	Description/Comments
Construction Site Runoff Controls	Every ECP is reviewed prior to any project being. As well as periodic Inspections are conducted to ensure all BMPs are properly working.	Continue to monitor all project sites to ensure 100% quality control is being done.	All construction projects within the City Limits of Texarkana are required to provide and use all Erosion Controls Plans for each project, upon City approval. All constructions sites will be monitored throughout the duration of each project to ensure no runoffs are found.
Public Education/ Outreach	Water Bills have a Stormwater message that are sent out once a year. As well as all complaints are addressed with informational literature to prevent future issues.	Informational literature is helpful in the process of educated our citizens of the pollutants that could protentional be discharged.	The City will continue to utilize all means available to help prevent any discharge of pollutants into our storm drains and our creeks. Education is a key tool in doing so.
Illicit Discharge Detection & Elimination	Marking of Storm Drains and conducting yearly Inspections of potential issues with our water systems.	Continuing to enforce all City of Texarkana Ordinances pertaining to Stomwater Management.	Education employees and citizens will help prevent any illicit discharge. Inspects are essential for protection in eliminating future discharge.

F. SWMP Modifications

1. The SWMP and MCM implementation procedures are reviewed each year.

_**X**___Yes____No

2. Changes have been made or are proposed to the SWMP since the NOI or the last annual report, including changes in response to TCEQ's review.
_____Yes__**X**__No

If "Yes," report on changes made to measurable goals and BMPs:

MCM(s)	Measurable Goal(s) or BMP(s)	Implemented or Proposed Changes (Submit NOC as needed)
NOT APPLICABLE		

Note: If changes include additions or substitutions of BMPs, include a written analysis explaining why the original BMP is ineffective or not feasible, and why the replacement BMP is expected to achieve the goals of the original BMP.

3. Explain additional changes or proposed changes not previously mentioned (i.e. dates, contacts, procedures, annexation of land, etc.).

G. Additional BMPs for TMDLs and I-Plans

Provide a description and schedule for implementation of additional BMPs that may be necessary, based on monitoring results, to ensure compliance with applicable TMDLs and implementation plans.

BMP	Description	Implementation Schedule (start date, etc.)	Status/Completion Date (completed, in progress, not started)
NOT APPLICABLE			

H. Additional Information

1. Is the permittee relying on another entity to satisfy any permit obligations?

___ Yes _X_ No

If "Yes," provide the name(s) of other entities and an explanation of their responsibilities (add more spaces or pages if needed).

Name and Explanation:

Name and Explanation:

Name and Explanation:

Name and Explanation:

2.a. Is the permittee part of a group sharing a SWMP with other entities?

___ Yes _X_ No

2.b. If "yes," is this a system-wide annual report including information for all permittees?

___ Yes ___ No

If "Yes," list all associated authorization numbers, permittee names, and SWMP responsibilities of each member (add additional spaces or pages if needed):

Authorization Number: _____ Permittee: _____

Authorization Number: _____ Permittee: _____

Authorization Number: _____ Permittee: _____

Authorization Number: _____ Permittee: _____

I. Construction Activities

1. The number of construction activities that occurred in the jurisdictional area of the MS4 (Large and Small Site Notices submitted by construction site operators):

11-Large and 5-Small Site Notices

2a. Does the permittee utilize the optional seventh MCM related to construction?

___ Yes __X__ No

2b. If "yes," then provide the following information for this permit year:

The number of municipal construction activities authorized under this general permit	
The total number of acres disturbed for municipal construction projects	120.723 (Large) 6.8 (Small)

Note: *Though the seventh MCM is optional, implementation must be requested on the NOI or on a NOC and approved by the TCEQ.*

H. Certification

If this is this a system-wide annual report including information for all permittees, each permittee shall sign and certify the annual report in accordance with 30 TAC §305.128 (relating to Signatories to Reports).

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

If you have questions on how to fill out this form or about the Stormwater Permitting program, please contact us at 512-239-4671.

Individuals are entitled to request and review their personal information that the agency gathers on its forms. They may also have any errors in their information corrected. To review such information, contact us at 512-239-3282.

DECLARATION OF DISASTER 2020-003

WHEREAS, the City of Texarkana, Texas, is currently in the midst of an enterprise-wide data incident; and

WHEREAS, threats to the City's data systems can have a profound impact on the daily operations of City; and

WHEREAS, this data incident is rapidly evolving, requiring immediate action to control the situation; and

WHEREAS, the Mayor of Texarkana, Texas, has determined that extraordinary measures must be taken under the authority of Texas law and the City Charter of the City of Texarkana, Texas, to protect the proper delivery of essential services provided by the City.

NOW, THEREFORE, BE IT PROCLAIMED BY THE MAYOR OF THE CITY OF TEXARKANA, TEXAS:

1. That a local state of disaster is hereby declared for Texarkana, Texas pursuant to §418.108(a) of the Texas Government Code.
2. Pursuant to §418.108(b) of the Texas Government Code, the state of disaster shall continue for a period of not more than seven days from the date of this declaration unless continued or renewed by the City Council of the City of Texarkana, Texas.
3. Pursuant to §418.108(c) of the Texas Government Code, this declaration of a local state of disaster shall be given prompt and general publicity and shall be filed promptly with the City Secretary.
4. Pursuant to §418.108(d) of the Texas Government Code, this declaration of a local state of disaster activates the city emergency management plan.
5. Pursuant to §418.108 of the Texas Government Code and / or Article II, Section 13 of the City Charter of the City of Texarkana, Texas, this declaration orders and authorizes the City Manager or her designee(s) as applicable to approve and implement such actions as necessary during the emergency to mitigate the current data incident.
6. That this proclamation shall take effect immediately from and after its issuance.

ORDERED this 8th day of December, 2020.

Bob Bruggeman, Mayor

Storm Drain Inlet Markings Plan for 2nd Permit and Beyond

Year 6 - University Ave. (Richmond Rd. to TAMUT Campus Drive)
Mark remaining inlets that haven't been marked (approx. 20)

Year 7 - University Ave. (TAMUT to Bridge)
Mark all inlets (approx. 39)

Year 8 - University Ave. (Bridge to Shilling)
Mark all inlets (approx. 35)

Year 9 - TAMUT Road (Divided Blvd. into TAMUT Main Campus)
Mark all inlets (approx. 41)

Year 10 - University Ave. (McKnight to I-30)
Mark all remaining inlets (approx. 27)

Year 11 - Gibson Lane (University to Richmond)
Mark all remaining (approx. 30)

Year 12 Pavillion Parkway (was extended to McKnight in 2017), University Park, Gibson Lane (King's Highway), West Park Blvd. ***(Updated 2018 for new construction)***
Mark all inlets (approx. 40) (67 marked 2018)

Year 13 Galleria Oaks and road tie ins, Arista, Stoneledge, Cowhorn Creek, Sam Warren, Christus Dr, N. Cowhorn Creek Loop ***(Updated 2018 for new construction)***
Mark remaining inlets on Arista and Stoneledge (approx. 11)
Mark remaining on Galleria Oaks (Arista to Summerhill – approx. 37)
Mark all inlets on Cowhorn Creek (Moores to I-30 - approx. 14)
Mark all inlets on Sam Warren (approx. 2)
Mark all inlets on Christus Drive (approx. 2)
Mark all inlets on N. Cowhorn Creek Loop (approx. 4)

Year 14 Galleria Oaks, Ozark Drive, Moores Lane, Summerfield Dr., Fieldcrest Dr., Serenity
Mark all inlets on Galleria Oaks (east of Summerhill – approx. 3)
Mark all inlets on Ozark Dr (approx. 5)
Mark all inlets on Moores Lane (east of Summerhill – approx. 1)
Mark all inlets Summerfield (approx. 4)
Mark all inlets on Fieldcrest (approx. 2)
Mark all inlets on Serenity (from Summerhill to curve – approx. 3)

Year 15 – Walton Drive, University
Mark all inlets on Walton Drive (approx. 39)
Mark all inlets on University (south of I-30 – approx. 2)

Year 16 – Old Boston Road, Belt Road, Cowhorn Creek, S. Cowhorn Creek Loop

Mark all inlets on Belt Road (approx. 5)
Mark all inlets on Old Boston Road (approx. 4)
Mark all inlets on Cowhorn Creek (south of I-30 – approx. 17)
Mark all inlets S. Cowhorn Creek Loop (approx. 1)

Year 17 – Kennedy Lane, College

Mark all inlets on Kennedy (approx. 16)
Mark all inlets on College (Belt to Texas – approx. 19)

Year 18 – Westlawn, Waco, Kilgore, Gazola, Terry

Mark all inlets on Westlawn (approx. 15)
Mark remaining inlets on Waco (approx. 4)
Mark remaining inlets on Kilgore (approx. 2)
Mark all inlets on Gazola (approx. 2)
Mark all inlets on Terry (approx. 3)

Year 19 – Area 1

Mark remaining inlets in Area 1

Year 20 – Area 2

Mark remaining inlets in Area 2

Year 21 – Area 3

Mark remaining inlets in Area 3

Year 22 – Area 4

Mark remaining inlets in Area 4

Year 23 – Area 5

Mark remaining inlets in Area 5

Year 24 – Area 6

Mark remaining inlets in Area 6

Year 25 – Area 7

Mark remaining inlets in Area 7

Year 26 – Area 8

Mark remaining inlets in Area 8

*This plan may be revised based on development of areas and new inlet locations. This plan shall be updated yearly.

Adopt- A-Spot Program Agreement

TEXARKANA

_Streets _Parks _Medians _Lots _Blocks _Trails _Alleys _Hydrants
_Cemetery Plots _Waterways _Storm Water Drains _Land Scaping Features

The following is a Letter of Agreement between the City of Texarkana, Texas, hereinafter called the "City", and

Beavers Junior (Engineers) & Texarkana Cultural Center

Hereinafter called the "Sponsor", recognizing the need and the desirability of a beautiful, litter-free community, and are entering this Agreement to permit the Sponsor to provide volunteer services at least four (4) times per year at the specific site known as

Rowwin Park - 2102 S. Ann St.

By signatures below, the Sponsor, both jointly and severally, acknowledge the potentially dangerous nature of the work and agree to the following terms and conditions:

- The Sponsor shall be required to adopt for a minimum period of two years.
- The Sponsor shall volunteer at the location **a minimum of four times a year**. It is desired that one of these days coincide with the Citywide Cleanup campaign in the spring and fall of each year. Monthly volunteering is encouraged, when possible.

  Required: Litter Cleanup

  Optional: (Place check by desired activities)

  ☑ Maintain Flower Bed/Landscaping

  ☑ Mow Grass. If yes, how often: As Needed Only

  ☐ Special Project: _____

- The Sponsor shall appoint or select a chairperson to serve as spokesperson for the Sponsor, who will be responsible for recording and reporting the volunteer hours worked and number of bags collected on cleanups to the City.
- The Sponsor and participants agree to abide by all laws, regulations, and guidelines relating to safety.
- The Sponsor shall be responsible for maintain a first-aid kit and adequate drinking water while volunteering on the adopted section.
- The Sponsor shall be responsible for prohibiting participants form either possessing or consuming alcoholic beverages while volunteering on the adopted section.
- The Sponsor shall ensure that individuals participating in a volunteer effort shall wear bright colored clothing or safety vests.
- If participants are 15 or younger, the Sponsor shall furnish adequate supervision by one or more adults.
- The Sponsor shall not subcontract or assign its duties or responsibilities to any other Sponsor organization, or enterprise without first consulting with the City of Texarkana, Texas.
- The Sponsor shall have the option of renewing the agreement subject to the approval of the City.
- The Sponsor shall report volunteer activities and hours on approved forms provided by the City of Texarkana. After each cleanup, these forms should be mailed to the Public Works Department at PO Box 1967, Texarkana, Texas 75504. A copy may be emailed to Amanda.Freeland@txkusa.org in lieu of mailing.

The City agrees to accomplish the following:

- Work with the Sponsor to determine the specific section to be adopted.
- Place a sign identifying the adopted section with the Sponsor's name or acronyms displayed. The Public Works Department must approve additional or customized signage
- Remove litter from the adopted section under unusual circumstances, i.e. remove large, heavy, or hazardous items.
- Continue to provide current level of maintenance.

If, in the sole judgment of the City, it is found that the adopting Sponsor is not meeting the terms and conditions of this agreement, upon 30 days' notice, the City may terminate the adopting agreement and remove the signs. This agreement may be modified in scope or altered in any other manner at the sole discretion of the City. The City reserves the right to modify or cancel the Adoption Program at any time and for any reason, at the sole discretion of the City. It is also agreed that the City does not assume liability for the actions of the Sponsor in performing maintenance on City property. This agreement may be amended at any time by mutual agreement of both the City and the Sponsor.

This agreement shall commence on the date listed by the Sponsor below and shall endure until such time as terminated by either the Sponsor or the City.

STOP WORK ORDER

April 29, 2021

Michael Rogers
Rogers Equipment
105 Slaton Rd
Nash, Texas 75569

Project/Site Address: 20 Enclave, Texarkana, Texas

Permit # 2021-L-4

A **"STOP WORK"** order is being posted on this project effective **IMMEDIATELY**.

Whereas, Violations of Chapter 125 (Stormwater Management Ordinance) have been found at the above referenced site, it is hereby ordered in accordance with the above Code that all persons cease, desist from, and **STOP WORK** at once pertaining to all construction or grading alterations on the above premises, except that work which is necessary for correction of the violations listed below. ***According to Chapter 125-63 of the Stormwater Management Ordinance: Failing to install erosion control devices or to maintain erosion control devices throughout the duration of land disturbing activities, in compliance with the approved erosion control plan for the location where the violation occurred;***

This violation is due to failure to comply with the City of Texarkana, Texas Stormwater Ordinance. In order to release this order, the following violations must be addressed immediately.

Nature of Violation(s)/Corrective Actions Required:

1. Silt fencing and/or all Best Management Practices (BMP's) must be correctly installed and retained throughout this project. Please refer to your Erosion Control Plan (ECP)
2. All tracking needs to be cleaned up immediately.
3. This includes dirt and mud that has collected in the drainage channel.
4. Dirt on site must be protected, there is no silt fencing/straw waddle to prevent this from washing off the property.

No additional work shall proceed until the City of Texarkana, Texas Stormwater Management Division inspects and approves the repairs contained in the Stop Work Order. Any activity other than work leading to compliance with this Stop Work Order will result in the issuance of a criminal penalty in an amount not to exceed **$2,000/day for each violation, or any greater criminal penalty authorized by State law and City Code Chapter 125-93**. Failure to comply with this Stop Work Order shall be deemed justification for cancellation of the Stormwater Permit. Under no circumstances shall verbal permission, given at any time by any person, be considered justification for any work to be performed or any deviation from approved plans to be made which violates any of these regulations.

Please send the corrected actions to the mailing address above, or you may email it to me at the address listed below. If you have questions concerning this violation you can contact our office at 903-798-3948.

STORMWATER MANAGEMENT DIVISION

May 07, 2021

Mr. David W. Clemons
6 Heatherwood Drive
Texarkana, Texas 75503

RE: Stormwater Management Complaint-Tree Trimming thrown into the Stormwater Drain located directly behind the residence @ 104 Lynda Avenue, Texarkana, Texas 75501

Dear Mr. Clemons,

On July 23, 2012, the City Council approved the passing of the Stormwater Management Ordinance. The purpose of this Ordinance is to regulate non-storm water discharges to the storm sewer system. As well as to prevent erosion and sedimentation of the storm water system. This is required as part of the Texas Pollutant Discharge Elimination System (TPDES) permit and required to be in compliance of our Storm Water Phase II General Permit with the Texas Commission on Environmental Quality (TCEQ).

We have received a complaint of there being trimmed tree limbs tossed over the property's (104 Lynda Avenue) back fence and clogging our Storm Drain System. According to Chapter 125 of the Stormwater Management Ordinance, it is a violation to intentionally dispose of garbage, rubbish, grass clippings, leaves or other vegetation into any gutter, street, sidewalk, inlet, or any other drainage device that connects with or drains into the MS4. Any violation of this Ordinance may result in a criminal penalty authorized by State Law and City Code Chapter 125-34;

Sec. 125-34. Specific prohibitions and requirements.

The specific prohibitions and requirements in this section are not inclusive of all the discharges prohibited by this chapter.

n. Any intentional disposal of garbage, rubbish, grass clippings, leaves or other vegetation into any gutter, street, sidewalk, inlet or other drainage device that connects with or drains into the MS4;

Sec. 125-97. Criminal prosecution.

Any person that violates or continues to violate this chapter shall be liable to criminal prosecution to the fullest extent of the law and shall be subject to a *criminal penalty of up to $2,000.00 per violation per day* as authorized by state law and section 125-93. The city may recover all attorneys' fees, court costs and other expenses associated with enforcement of this chapter, including sampling and monitoring expenses. (Code 1961, § 32A-25; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Please advise any Contractor, Tenet or Landscaper of this violation (if applicable)

If you have any questions or comments about Stormwater Management Ordinance, you may view the attached information on the City's Ordinance.

RE: Stormwater Management Complaint- Drainage is not being maintained, causing run off onto properties behind the lot @ Kings Hwy N (BLK/ TRACT-LOT 1), Texarkana, Texas 75503

Dear Property Owner,

On July 23, 2012, the City Council approved the passing of the Stormwater Management Ordinance. The purpose of this Ordinance is to regulate non-storm water discharges to the storm sewer system. As well as to prevent erosion and sedimentation of the storm water system. This is required as part of the Texas Pollutant Discharge Elimination System (TPDES) permit and required to be in compliance of our Storm Water Phase II General Permit with the Texas Commission on Environmental Quality (TCEQ).

We have received a complaint of the drainage device located on the property @ (Kings Hwy N (BLK/ TRACT-LOT 1), Texarkana, Texas 75503) is not being maintained and clogging the Storm Drain System. Thus, causing run off on to properties located North of lot. According to Chapter 125 of the Stormwater Management Ordinance, it is a violation to intentionally dispose of garbage, rubbish, grass clippings, leaves or other vegetation into any gutter, street, sidewalk, inlet, or any other drainage device that connects with or drains into the MS4. Any violation of this Ordinance may result in a criminal penalty authorized by State Law and City Code Chapter 125-34;

Sec. 125-34. Specific prohibitions and requirements.

The specific prohibitions and requirements in this section are not inclusive of all the discharges prohibited by this chapter.

n. Any intentional disposal of garbage, rubbish, grass clippings, leaves or other vegetation into any gutter, street, sidewalk, inlet or other drainage device that connects with or drains into the MS4;

Sec. 125-97. Criminal prosecution.

Any person that violates or continues to violate this chapter shall be liable to criminal prosecution to the fullest extent of the law and shall be subject to a ***criminal penalty of up to $2,000.00 per violation per day*** as authorized by state law and section 125-93. The city may recover all attorneys' fees, court costs and other expenses associated with enforcement of this chapter, including sampling and monitoring expenses. (Code 1961, § 32A-25; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Please advise any Contractor, Tenet, or Landscaper of this Violation (if applicable).

If you have any questions or comments about Stormwater Management Ordinance, you may view the attached information on the City's Ordinance.

November 15, 2021

RE: Stormwater Management Complaint-Discharge of Pool Water @ 3404 Moore Drive, Texarkana, Texas 75503.

Dear Ms. Mueller,

On July 23, 2012, the City Council approved the passing of the Stormwater Management Ordinance. The purpose of this Ordinance is to regulate non-storm water discharges to the storm sewer system. As well as to prevent erosion and sedimentation of the storm water system. This is required as part of the Texas Pollutant Discharge Elimination System (TPDES) permit and required to be in compliance of our Stormwater Phase II General Permit with the Texas Commission on Environmental Quality (TCEQ).

We have received a complaint of pool water being discharged from the property of (**3404 Moore Drive**), this discharge has flood surrounding properties. According to Chapter 125 of the Stormwater Management Ordinance, **no person shall recklessly introduce, or cause to be introduced, into the MS4 any discharge that causes or contributes to causing the city to violate a water quality standard, the City's TPDES permit or any other discharge permit for discharges from its MS4.** Any violation of this Ordinance may result in a criminal penalty authorized by State Law and City Code Chapter 125.

Please advise any Contractor, Tenet, or Pool Maintenance Company of this Violation (if applicable).

If you have any questions or comments about Stormwater Management Ordinance; you may view the attached information on the City's Ordinance. Along will proper dischargement of pool water.

Sincerely,

Amanda Freeland

STORMWATER POLLUTION PREVENTION

GUIDELINES FOR PROPER SWIMMING POOL OR SPA DRAINAGE

Why does it matter how I drain my pool, spa or filter my backwash?

Street drains and storm drains lead to rivers, lakes, streams, and creeks. Anything discharged into street/storm drains, including swimming pool water, flows directly into the nearest creeks, streams or area lakes. The chemicals in the discharged water become a source of storm-water pollution, which can affect human health and increase the costs of treating water to safe drinking standards.

Improperly draining your swimming pool into the street or directly into a storm drain can harm aquatic organisms. Chlorine, bromine, algaecides, biocides, water conditioners, stabilizers, and other chemicals in pool water are toxic to fish and other aquatic life. Diatomaceous earth (DE), cellulose fiber, and sand particles from backwash water can fill in the spaces in the stream bed gravel, preventing oxygen from reaching fish eggs and young fish. DE and cellulose fiber can also clog fish gills.

To Drain Your Pool, Spa or Fountain

There are three options for draining your swimming pool. Please note that whichever method you choose, you must dechlorinate the water before draining occurs.

Here's how:

- Dechlorinate naturally: Allow the water to sit in the sun for five-10 days without adding any chlorine, or
- Use a chemical dechlorination additive (contact a local pool store for options)
- Verify water is dechlorinated with a pool testing kit.

Filter Backwash

NEVER discharge filter backwash to the storm drain system. It is a violation of the Federal, State and City regulations. This practice is illegal and may result in fines and/or jail.

Disposing of filter rinse water and backwash:

- Obtain written authorization from TWU.
- Use the discharge flow rate determined by TWU to avoid back-ups or overflows.
- Filter backwash must be collected, contained and discharged to the sanitary sewer.
- Cartridge filters should be rinsed in a sink, bathtub or over a lawn or other vegetated area.
- Use a separation tank for diatomaceous earth (DE) and cellulose fiber filters to capture the DE or fibers.
- For water conservation, direct the clean water back into the pool.

Know the Law

It is a violation of the City of Texarkana's Code of Ordinances to drain chlorinated water or filter backwash from your swimming pools or spas to the storm sewer system.

Remember, you are responsible for the actions of your pool maintenance service. Be sure you know how your service is disposing of your pool or spa water and the filter backwash. They must follow all dis-charge requirements set forth by the City.

Report Illegal Discharges to the Storm Sewer System

The City of Texarkana, Texas
Stormwater Management
903.798.3948 | stormwater@txkusa.org
919 Elm Street Texarkana, TX 75501
www.ci.texarkana.tx.us

Option 1: Your Lawn

Drain dechlorinated water to the grass/turf or any area on your property that will allow the water to percolate into the ground, if and only if:

- You do not cause runoff onto or flooding of your neighbor's property or any other adjacent property.
- The land area is sufficient to prevent erosion and runoff into a ditch, creek or other conveyance (i.e. storm drain).
- Care is taken to not create puddles of standing water, which could potentially provide a breeding ground for mosquitoes.
- You do not cause harm to the environment. Discharging saltwater to landscape can significantly damage vegetation and soils due to high salt content.

This water can be used to irrigate plants, saturate dry ground or soak into mulched areas.

Option 2: The Sanitary Sewer

The following requirements for draining to the Sanitary Sewer ***apply to pool water only*** - anything else is prohibited.

To drain your pool to the sanitary sewer you ***must*** have prior written approval from Texarkana Water Utilities. Most in-ground pools have a drain line connected to the sanitary sewer which can be used once the pool water has been ***dechlorinated***.

Follow the following steps:

- **Verify the pH is between 5.5 and 10.5 S.U.**
- Locate the sanitary sewer cleanout on your property or an indoor drain such as a sink or bathtub.
- **Using a hose, connect a siphon or sump pump that pumps no more than the specific maximum flow** rate that was determined for you by Texarkana Water Utilities. Call (903) 798-3800.
- Pump the water from the pool or spa to the cleanout or indoor drain.
- **Replace all cleanout covers when finished.**

DO NOT drain swimming pool or spa water to your SEPTIC SYSTEM as it may cause system failure. It is not advisable to connect a hose to your indoor toilet to drain your swimming pool or spa. In most cases, water being pumped from your pool will drain faster than the time needed for flushing and refilling of the commode.

If you are unsure whether or not the discharge from your pool will create a problem in the sanitary sewer system or wastewater treatment plant, contact Texarkana Water Utilities (TWU) at 903-798-3800.

Option 3: The Storm Drain

Swimming pool water may be discharged to the storm drain only after all of the following conditions are met:

- Other disposal methods (i.e. your lawn or sanitary sewer) are not possible. The pool is ***not*** a saltwater pool.
- The pool or spa is completely ***dechlorinated***.
- The pH of the water is between 6.5 and 8.5.
- There is no discharge of filter media.
- There is no discharge of acid cleaning wastes, algae or sediments.
- Discharge water will not pond or flow to neighboring properties.

Different Types of Connections

Sec. 125-34. Specific prohibitions and requirements.

The specific prohibitions and requirements in this section are not inclusive of all the discharges prohibited by this chapter.

(1) No person shall recklessly introduce, or cause to be introduced, into the MS4 any discharge that causes or contributes to causing the city to violate a water quality standard, the city's TPDES permit or any other discharge permit for discharges from its MS4.

(2) It shall be a violation of this chapter for any person to intentionally deposit, discharge, dispose, drain, dump, emit, empty, leak, leach, pump, pour, spill, throw or otherwise introduce or cause to be introduced into the MS4, or any storm sewer manhole, catchbasin, private drain, ditch, street, gutter, creek, stream, tributary or any other drainage device which connects with or drains into the MS4, any of the following described materials or substances within the city limits:

a. Any oil, antifreeze or any other motor vehicle fluid;

b. Any industrial waste;

c. Any direct discharge of concrete truck washout water;

d. Any hazardous waste, including hazardous household waste;

e. Any domestic sewage or septic tank waste, grit trap waste or grease trap waste;

f. Any wastewater from a commercial carwash facility; from any vehicle washing, cleaning or maintenance at any new or used automobile or other vehicle dealership, rental agency, body shop, repair shop, maintenance facility or automotive-related facility; or from any washing, cleaning or maintenance of any business or commercial or public service vehicle, including a truck, bus or heavy equipment, by a business that operates more than two such vehicles;

g. Any wastewater from a commercial mobile power washer or from the washing or other cleaning of a building exterior that contains any soap, detergent, degreaser, solvent or any other harmful cleaning substance;

h. Any wastewater from commercial floor, rug or carpet cleaning;

i. Any commercial runoff or wash-down water from any animal pen, kennel or fowl or livestock containment area;

j. Any filter backwash from a swimming pool or fountain, without the backwash first being filtered through a water-filtering device;

k. Any wastewater from street washing or other cosmetic cleaning that contains any soap, detergent, solvent, degreaser, emulsifier, dispersant or any other harmful cleaning substance; or any wastewater from the wash-down or other cleaning of any pavement where any spill, leak or other release of oil, motor fuel or other petroleum or hazardous substance has occurred, unless all harmful quantities of such released material has been previously removed;

l. Any effluent from a cooling tower, condenser, compressor, emissions scrubber, emissions filter or the blow down from a boiler;

m. Any substance or material that will damage, block or clog the MS4;

n. Any intentional disposal of garbage, rubbish, grass clippings, leaves or other vegetation into any gutter, street, sidewalk, inlet or other drainage device that connects with or drains into the MS4;

o. Super chlorinated potable water from water line flushing and disinfection;

p. Any acid waste materials or alkaline waste materials;

q. Any water or waste containing fats, oils, grease, free-floating or insoluble oil;

r. Any gasoline, naphtha, fuel oil, mineral oil or other flammable or explosive liquid, solid or gas;

s. Any noxious, malodorous, poisonous or reactive substance which, either singularly or by interaction with other substances or by its accumulation in the MS4 becomes injurious or potentially injurious to human, plant or animal life or property;

t. Any fire protection water containing oil or hazardous substances or materials that the fire code in this Code requires to be contained and treated prior to discharge, unless treatment adequate to remove pollutants occurs prior to discharge (this prohibition does not apply to discharges or flow from firefighting by the fire department);

u. Any water from a water curtain in a spray room used for painting vehicles or equipment;

v. Any contaminated runoff from a vehicle wrecking yard;

w. Any release from a petroleum storage tank (PST); any leachate or runoff from soil contaminated by a leaking PST; or any discharge of pumped, confined or treated wastewater from the remediation of any such PST release, unless the discharge is in compliance with all state and federal standards and requirements and does not contain a harmful quantity of any pollutant;

x. Any pavement wash water from a service station, unless such wash water has passed through a properly functioning and maintained, grease, oil and sand interceptor before discharge into the MS4;

y. Any harmful quantity of concrete, asphalt, sediment, silt, earth, soil or other material associated with clearing, grading, excavation or other construction activities in excess of what could be retained on site or captured by employing sediment and erosion control measures to the maximum extent practicable;

z. Pesticides, herbicides and fertilizers regulated as follows:

1. No person shall use or cause to be used any pesticide, herbicide or fertilizer in any manner that the person knows, or reasonably should know, is likely to cause, or does cause, a harmful quantity of the pesticide, herbicide or fertilizer to enter the MS4 or waters of the United States;

2. No person shall dispose of, discard, store or transport a pesticide, herbicide or fertilizer or a pesticide, herbicide or fertilizer container, in a manner that the person knows, or reasonably should know, is likely to cause, or does cause, a harmful quantity of the pesticide, herbicide or fertilizer to enter the MS4 or waters of the United States;

3. Any license, permit, registration certification or evidence of financial responsibility required by state or federal law for sale, distribution, application, manufacturer transportation, storage or disposal of a pesticide herbicide or fertilizer must be presented to the director or the directors delegate and any city law enforcement officer for examination upon request;

4. No person shall use or cause to be used any pesticide or herbicide contrary to any directions for use on any labeling required by state or federal statute or regulation;

aa. Used oil regulated as follows:

1. It shall be a violation of this chapter for a person to:

(i) Intentionally discharge or dispose of used motor vehicle fluids, including motor oil and antifreeze, into the MS4 or a sewer, drainage system, septic tank, surface water, groundwater or watercourse;

(ii) Knowingly mix or commingle used oil with solid waste that is to be disposed of in a landfill or directly dispose of used oil on land or in a landfill; or

(iii) Intentionally apply used oil to a road or land for dust suppression, weed abatement or other similar use that introduces used oil into the environment;

2. All businesses that change motor oil for the public and municipal waste landfills are encouraged to serve as publicly used oil collection centers as provided by of the Texas Health and Safety Code § 371.024;

bb. Erosion control regulated as follows:

1. It is unlawful for any person having control of real property in the city to suffer or permit soil, rock, mud or debris to wash, slide or otherwise be moved from the real property onto any adjacent property, street, alley, utility facility, right-of-way or easement through erosion;

2. Any person in control of real property shall:

(i) Prevent soil, mud, rock or debris from being deposited on or transported through erosion to any adjacent property, street, alley, utility facility, right-of-way or easement;

(ii) Inspect the property and acquaint oneself with the conditions existing; and

(iii) Remedy any condition that might allow soil, mud, rock or debris to wash, slide or otherwise be transported to any adjacent property, street, alley, utility facility, right-of-way or easement through erosion.

(Code 1961, § 32A-10; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Subject: RE: Stormwater Information On Water Bills

Good afternoon, ladies.

Can we please get the below listed message placed on the next round of billing?

"Residents are allowed to place one cubic yard of bulk waste at curbside with their waste and recycling carts on the same collection day each week.
One cubic yard of bulk waste is the equivalent of the addition of two of the 96 gallon waste carts or an item the size of a sofa, large chair, or washing machine.
Those needing to remove an amount of bulk waste exceeding the one cubic yard allotment may make arrangements for the removal of such items by contacting Waste Management (903) 794-4111 to schedule a pick-up and make payment arrangements."

Thank you,
Amanda Freeland

2021 Arbor Day Tree Giveaway

For Immediate Release:

TEXARKANA, TX- The City of Texarkana, TX and the Texas A&M Forestry Service will partner together for their 7th annual Arbor Day tree giveaway on Saturday March 6th. The event will begin at 9:00 a.m. at Spring Lake Park across from the Rotary Splash Pad and will extend until all trees are given away.

Members of the City of Texarkana, Texas Planning and Community Development Department and the Texas A&M Forest Service will be on-hand to help give away 1,000 bare root seedlings. The public is invited to participate in the tree giveaway, however, due to COVID-19 those interested in obtaining trees will be asked to stay in their vehicle and a volunteer will bring the trees to you.

The tree species have been carefully researched by a certified arborist and varieties were selected that are adaptable to Texarkana's climate. Available species may include cherry bark, bald cypress, and sawtooth oak.

For more information, please contact Keith Beason at 903-798-3901 or keith.beason@txkusa.org

DON'T MESS WITH TEXAS TRASH OFF 2021

APRIL, 17TH 2021 | STARTS AT 9 A.M. ENDS AT 12 P.M.

Join us as we clean Texarkana's roadways to improve our community. The City will supply trash bags, gloves and a limited number of safety vests for each project.

Access the QR code to register yourself or a group for the Trash-Off Event 2021!

Stormwater runoff is precipitation from rain or snowmelt that flows over the ground. As it flows, it can pick up debris, chemicals, dirt and other pollutants and desposit them into a storm drain. This water goes directly into streams, lakes and rivers - your drinking, swimming and fishing water!

YOU can help keep the water clean by doing a few of these things:

- Picking up pet waste
- Mulching grass clippings
- Using commercial carwashes
- Repairing auto leaks
- Recycling hazardous house waste

The City of Texarkana, Texas
Stormwater Management 919 Elm Street
Texarkana, TX 75501
www.ci.texarkana.tx.us
(903) 798-3948

Report illegal dumping of any kind into the stormwater drains or inlets by calling (903) 798-3948 or send an email to stormwater@txkusa.org

Filter Backwash

NEVER discharge filter backwash to the storm drain system. It is a violation of the Federal, State and City regulations. This practice is illegal and may result in fines and/or jail.

Disposing of filter rinse water and backwash:

- Obtain written authorization from TWU.
- Use the discharge flow rate determined by TWU to avoid back-ups or overflows.
- Filter backwash must be collected, contained and discharged to the sanitary sewer.
- Cartridge filters should be rinsed in a sink, bathtub or over a lawn or other vegetated area.
- Use a separation tank for diatomaceous earth (DE) and cellulose fiber filters to capture the DE or fibers.
- For water conservation, direct the clean water back into the pool.

Know the Law

It is a violation of the City of Texarkana's Code of Ordinances to drain chlorinated water or filter backwash from your swimming pools or spas to the storm sewer system.

Remember, you are responsible for the actions of your pool maintenance service. Be sure you know how your service is disposing of your pool or spa water and the filter backwash. They must follow all dis-charge requirements set forth by the City.

STORMWATER POLLUTION PREVENTION

A comprehensive guide to properly draining your swimming pool or spa

Report Illegal Discharges to the Storm Sewer System

The City of Texarkana, Texas Stormwater Management

919 Elm Street Texarkana, TX 75501

Brought to you by your friends at the City of Texarkana, Texas

Why does it matter how I drain my pool, spa or filter my backwash?

Street drains and storm drains lead to rivers, lakes, streams, and creeks. Anything discharged into street/storm drains, including swimming pool water, flows directly into the nearest creeks, streams or area lakes. The chemicals in the discharged water become a source of storm-water pollution. which can affect human health and increase the costs of treating water to safe drinking standards.

Improperly draining your swimming pool into the street or directly into a storm drain can harm aquatic organisms. Chlorine, bromine, algaecides, biocides, water conditioners, stabilizers, and other chemicals in pool water are toxic to fish and other aquatic life. Diatomaceous earth (DE), cellulose fiber, and sand particles from backwash water can fill in the spaces in the stream bed gravel, preventing oxygen from reaching fish eggs and young fish. DE and cellulose fiber can also clog fish gills.

To Drain Your Pool, Spa or Fountain

There are three options for draining your swimming pool. Please note that whichever method you choose, you must dechlorinate the water before draining occurs.

Here's how:

- Dechlorinate naturally: Allow the water to sit in the sun for five-10 days without adding any chlorine; or
- Use a chemical dechlorination additive (contact a local pool store for options).
- Verify water is dechlorinated with a pool testing kit.

Option 1: Your Lawn

Drain dechlorinated water to the grass/turf/or any area on your property that will allow the water to percolate into the ground, if and only if:

- You do not cause runoff onto or flooding of your neighbor's property or any other adjacent property.
- The land area is sufficient to prevent erosion and runoff into a ditch, creek or other conveyance (i.e. storm drain).
- Care is taken to not create puddles of standing water, which could potentially provide a breeding ground for mosquitoes.
- You do not cause harm to the environment. Discharging saltwater to landscape can significantly damage vegetation and soils due to high salt content.

This water can be used to irrigate plants, saturate dry ground or soak into mulched areas.

Option 2: The Sanitary Sewer

The following requirements for draining to the Sanitary Sewer ***apply to pool water only*** - anything else is prohibited.

To drain your pool to the sanitary sewer you ***must*** have prior written approval from Texarkana Water Utilities. Most in-ground pools have a drain line connected to the sanitary sewer which can be used once the pool water has been ***dechlorinated.***

Follow the following steps:

- Verify the pH is between 5.5 and 10.5 S.U.
- Locate the sanitary sewer cleanout on your property or an indoor drain such as a sink or bathtub.
- Using a hose, connect a siphon or sump pump that pumps no more than the specific maximum flow rate that was determined for you by Texarkana Water Utilities. Call (903) 798-3800.
- Pump the water from the pool or spa to the cleanout or indoor drain.
- **Replace all cleanout covers when finished.**

DO NOT drain swimming pool or spa water to your SEPTIC SYSTEM as it may cause system failure. It is not advisable to connect a hose to your indoor toilet to drain your swimming pool or spa. In most cases, water being pumped from your pool will drain faster than the time needed for flushing and refilling of the commode.

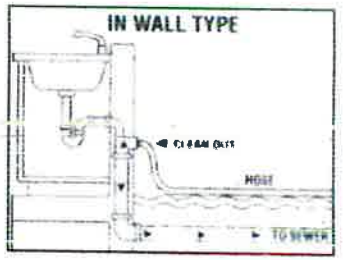
If you are unsure whether or not the discharge from your pool will create a problem in the sanitary sewer system or wastewater treatment plant, contact Texarkana Water Utilities (TWU) at 903-798-3800.

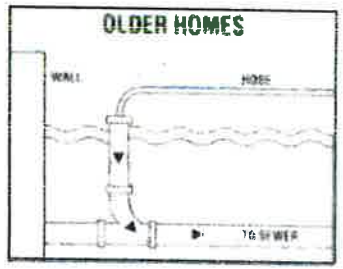
Option 3: The Storm Drain

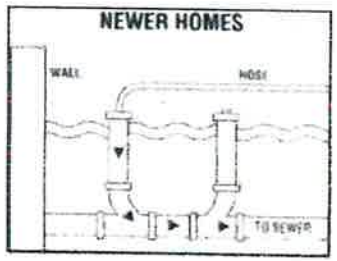
Swimming pool water may be discharged to the storm drain only after all of the following conditions are met:

- Other disposal methods (i.e. your lawn or sanitary sewer) are not possible. The pool is ***not*** a saltwater pool.
- The pool or spa is completely ***dechlorinated.***
- The pH of the water is between 6.5 and 8.5.
- There is no discharge of filter media.
- There is no discharge of acid cleaning wastes, algae or sediments.
- Discharge water will not pond or flow to neighboring properties.

Different Types of Connections







How do I choose the right business as a customer?

Commercial Mobile Washing Units that are abiding by the Stormwater Permitting process, will have a visible Unit Registration Number. They will have a permit either visible or readily available for your view. These businesses will also have Best Management Practices that they are required to prevent the flow of contaminated water into storm drains, roadways, ditches, and drainage creeks. They also will have a list of their cleaning products that they are approved to use to meet the guidelines for their permit. If customers have any questions regarding units, permits, BMP's, or products in use, they are welcome to contact the Stormwater Division.

City of Texarkana, Texas
Public Works

919 Elm Street

Fax: 903-792-6419
E-mail: stormwater@txkusa.org

Stormwater Management Division

Commercial Mobile Car Washing

What is a Commercial Mobile Washing Unit?

Commercial Mobile Washing Units are businesses with a truck and/or trailer set up that may have portable water tanks and pressure washers to earn money for washing your vehicle on site (work/ home). These setups may also include detail work on the body and/or wheels of the vehicle. This is not a new business, however it is a recent trend taking over cities in Texas. While this practice is convenient for customers, it does bring up issues with clean water efforts in cities and states that require water protection. This brochure will educate business owners and customers of what to expect with proper mobile washing in our city.

What is required for a Commercial Mobile Washing Unit?

Commercial Mobile Washing Units will have a permit to fill out for the Stormwater Management Division at Public Works. Once this permit is processed and approved, each business will receive a special Unit Registration Number. This number will be required to be visible on the wash unit as per the information provided to the contractor. The permit will be required to either be visible or available for inspection at any possible time. This is to ensure that wash units are following the guidelines inside our City limits that meet the City Ordinance, State Health & Safety Codes, TCEQ regulations, and the EPA regulations. Proper Best Management Practices (BMP's) are required to be submitted for approval and followed at all times. If any unit is found to not be following the approved BMP's for their permit, the Stormwater Division reserves the right to issue a Corrective and/or Stop Work Order to the business for all all washing activities. The City Ordinance also allows for a fine of up to $2,000.00 per violation. As part of the permit review process, all Mobile Wash Unit businesses will be required to submit a list of expected products to be used. These are required to be Phosphorous free, Biodegradable, and Non-Toxic soaps or cleaners. While using "biodegradable" only products is appreciated, it is still just as dangerous to water and wildlife once introduced into our streams and lakes as regular soaps, as it only means that it will not hard bacteria in the sewage treatment plant, and that it breaks down faster than other products. Phosphorous free and Non-Toxic products will have a much less drastic effect on water and wildlife if there is any accidental introduction to the streams and lakes as they are still harmful in different aspects. We also want everyone to succeed in their business ventures, but we need for you to protect your environment while you work. What is life without clean water?

City of Texarkana - SW Ordinances

Chapter 125 - STORMWATER MANAGEMENT[1]

Footnotes:

--- (1) ---

State Law reference— Authority of local government which owns or operates a disposal system to enact and enforce ordinances and rules to control and regulate the type character, and quality of waste discharged to the disposal system and to require pretreatment of waste to be discharged to the system, Texas Water Code § 26.176.

ARTICLE I. - IN GENERAL

Sec. 125-1. - Purpose/intent.

The purpose of this chapter is to provide for the health, safety and general welfare of the citizens of the city through the regulation of nonstormwater discharges to the storm drainage system to the maximum extent practicable as required by federal and state law. This chapter establishes methods for controlling the introduction of pollutants into the municipal separate storm sewer system (MS4) in order to comply with requirements of the Texas Pollutant Discharge Elimination System (TPDES) permit process. This chapter will also prevent damage to the environment and minimize public and private losses due to erosion and sedimentation in all areas. The objectives of this chapter are to:

(1) Protect human life, health and property;

(2) Maintain flood control and storm drainage projects and cleaning sediment out of storm drains, streets, sidewalks and watercourses;

(3) Minimize negative impacts to adjacent properties due to erosion and sedimentation;

(4) Minimize negative impact to public streets and bridges, storm sewer systems and drainageways;

(5) Minimize damage due to drainage and erosion to public facilities and infrastructure, such as water and gas mains, electric service, telephone and sewer lines;

(6) Help maintain a stable tax base and preserve land values;

(7) Preserve the natural beauty and aesthetics of the community;

(8) Control and manage stormwater runoff and the sediment load in that runoff from points and surfaces within subdivisions;

(9) Establish a reasonable standard of design for development that prevents potential flood and erosion damage;

(10) Reduce the pollutant loading to streams, ponds and other watercourses;

(11) Prohibit illicit connections and discharges to the municipal separate storm sewer system;

(12) Establish legal authority to carry out all inspection, surveillance and monitoring procedures necessary to ensure compliance with this chapter; and

(13) Facilitate compliance with state and federal standards and permits by owners and operators of industrial and construction sites within the city by guiding, regulating and controlling the design, construction, use and maintenance of any development or other activity that disturbs or breaks the topsoil or results in the movement of earth on land in the city.

(Code 1961, § 32A-1; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-2. - Administration.

Enforcement and administration of this chapter shall be the responsibility of such offices or officers as designated by the director of public works. The director may appoint such inspectors and assistants as necessary to assist in the performance of these duties. The director shall also be responsible to address other stormwater issues as they relate to the city's compliance with its small MS4 stormwater permit as issued by TCEQ to the city.

(Code 1961, § 32A-2; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-3. - Related ordinances.

In addition to this chapter, the city has other ordinances, regulations and specifications possibly affecting water quality. In the event of an irreconcilable conflict between this chapter and any other ordinances of the city, the most restrictive ordinance shall govern.

(Code 1961, § 32A-3; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-4. - Incorporation of federal and state statutes, rules and regulations.

A reference within this chapter to a federal or state statute, rule or regulation includes all amendments to such statute, rule or regulation made after the adoption of the chapter.

(Code 1961, § 32A-4; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-5. - Acronyms.

The following abbreviations, when used in this chapter, shall have the designated meanings:

(1) BMP—Best management practices;
(2) CFR—Code of Federal Regulations;
(3) CGP—Construction general permit, TXR150000;
(4) CWA—Clean Water Act;
(5) EPA—U.S. Environmental Protection Agency;
(6) ESCP—Erosion and sediment control plan;
(7) FR—Federal Register;
(8) HHW—Hazardous household waste;
(9) mg/l—Milligrams per liter;
(10) MS4—Municipal separate storm sewer system;
(11) NOI—Notice of intent;
(12) NOT—Notice of termination;
(13) NPDES—National Pollutant Discharge Elimination System;
(14) ppb—Parts per billion;
(15) PST—Petroleum storage tank;
(16) RPE—Registered professional engineer;
(17) RQ—Reportable quantity;
(18) SWO—Stop work order;

(19) SWPPP or SWP3—Stormwater pollution prevention plan;

(20) TAC—Texas Administrative Code;

(21) TCEQ—Texas Commission on Environmental Quality;

(22) TPDES—Texas Pollutant Discharge Elimination System;

(23) TPH—Total petroleum hydrocarbons;

(24) USC—United States Code.

(Code 1961, § 32A-5; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-6. - Definitions.

The following words, terms and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

Agricultural stormwater runoff means any stormwater runoff from orchards, cultivated crops, pastures, range lands and other nonpoint source agricultural activities, but not discharges from concentrated animal feeding operations as defined in 40 CFR 122.23 or discharges from concentrated aquatic animal production facilities as defined in 40 CFR 122.24.

Best management practices (BMPs) means schedules of activities, prohibitions of practices, general good housekeeping practices, pollution prevention and educational practices, maintenance procedures and other management practices to prevent or reduce the discharge of pollutants directly or indirectly to stormwater, receiving waters or stormwater conveyance systems. The term "best management practices" also include treatment practices, operating procedures and practices to control site runoff, spillage or leaks, sludge or water disposal, or drainage from raw materials storage areas.

Classified segment means and refers to a water body that is listed and described in appendix A or appendix C of the Texas Surface Water Quality Standards, at 30 TAC § 307.10.

Clean Water Act (CWA) means the Federal Water Pollution Control Act (33 USC § 1251 et seq.), and any subsequent amendments thereto.

Common plan of development or sale means a construction activity that is completed in separate stages, separate phases or in combination with other construction activities. A common plan of development or sale is identified by the documentation for the construction project that identifies the scope of the project and may include plats, blueprints, marketing plans, contracts, building permits, a public notice or hearing, zoning requests or other similar documentation and activities.

Construction means the disturbance of soils associated with clearing, grading or excavation activities, as well as other construction-related activities (e.g., stockpiling of fill material, demolition). These activities may be subject to requirements of TPDES General Permit No. TXR150000 (construction general permit).

Contaminated means containing a harmful quantity of any substance.

Contamination means the presence of or entry into a public water supply system, the MS4, of any substance which may be deleterious to the public health and/or the quality of the water.

Cosmetic cleaning means cleaning done for cosmetic purposes. The term "cosmetic cleaning" does not include industrial cleaning, cleaning associated with manufacturing activities, hazardous or toxic waste cleaning, or any cleaning otherwise regulated under federal, state or local laws.

Day or *days* means calendar days, unless otherwise stated.

Director means the city's director of public works, or the director's designee responsible for the administration and enforcement of this chapter.

Discharge means any addition or introduction of any pollutant, stormwater or any other substance whatsoever into the municipal separate storm sewer system (MS4).

Discharger means any person who causes, allows, permits or is otherwise responsible for a discharge, including, without limitation, any operator of a construction site or industrial facility.

Environmental protection agency (EPA) means the United States Environmental Protection Agency, or any duly authorized official of said agency.

Erosion and sediment control plan (ESCP) means a set of best management practices or equivalent measures designed to control surface runoff and erosion and to retain sediment on a particular site during the period in which preconstruction and construction-related land disturbance, fills and soil storage occur, and before final improvements are completed.

Facility means any facility, including construction sites, required by the Federal Clean Water Act to have a permit to discharge stormwater associated with industrial activity.

Fire code means the "Fire Prevention and Protection" chapter of the city Code.

Fire department means the fire department of the city, or any duly authorized representative thereof.

Fire protection water means any water and any substances or materials contained therein, used by any person, other than the fire department, to control or extinguish a fire.

Harmful quantity means the amount of any substance that will cause pollution of the MS4, or that will cause lethal or sublethal adverse effects on representative, sensitive aquatic monitoring organisms belonging to the city, upon their exposure to samples of any discharge into waters in the MS4.

Hazardous materials means any material, including any substance, waste or combination thereof, which because of its quantity, concentration or physical, chemical or infectious characteristics may cause, or significantly contribute to, a substantial present or potential hazard to human health, safety, property or the environment when improperly treated, stored, transported, disposed of or otherwise managed.

Illegal discharge means any direct or indirect nonstormwater discharge to the storm drain system, except as exempted in section 125-33.

Illicit connections. The term "illicit connections" are defined as either of the following:

(1) Any drain or conveyance, whether on the surface or subsurface, which allows an illegal discharge to enter the storm drain system, including, but not limited to, any conveyances which allow any nonstormwater discharge, including sewage, process wastewater and wash water to enter the storm drain system and any connections to the storm drain system from indoor drains and sinks, regardless of whether said drain or connection had been previously allowed, permitted or approved by the city; or

(2) Any drain or conveyance connected from a commercial or industrial land use to the storm drain system which has not been documented in plans, maps or equivalent records and approved by the city.

Industrial activity means activities subject to TPDES general permits as defined in part II, section A, paragraph 1 of TPDES General Permit No. TXR050000.

Mobile commercial cosmetic cleaning means power washing, steam cleaning and any other mobile cosmetic cleaning operation, of vehicles and/or exterior surfaces, engaged in for commercial purposes.

Municipal separate storm sewer system (MS4) means the system of conveyances, including sidewalks, roads with drainage systems, municipal streets, catchbasins, curbs, gutters, ditches, manmade channels or storm drains, owned and operated by the city and designed or used for collecting or conveying stormwater, and which is not used for collecting or conveying sewage.

National Pollutant Discharge Elimination System (NPDES) means the national program for issuing, modifying, revoking and reissuing, terminating, monitoring and enforcing permits, and imposing and enforcing pretreatment requirements, under sections 307, 402, 318, and 405 of the Federal Clean Water Act.

Nonpoint source means any source of any discharge of a pollutant that is not a point source.

Nonstormwater discharge means any discharge to the storm drain system that is not composed entirely of stormwater.

Notice of change (NOC) means written notification from the permittee to the executive director of TCEQ providing changes to information that was previously provided to the agency in a notice of intent.

Notice of intent (NOI) means the notice of intent that is required by the TPDES stormwater multisector general permit, the TPDES stormwater construction general permit or any similar general permit to discharge stormwater associated with industrial or construction activity that is issued by the EPA or the TCEQ.

Notice of termination (NOT) means a written submission to the executive director of TCEQ from a permittee authorized under a general permit requesting termination of coverage under the applicable general permit.

NPDES permit means a permit issued by the EPA, or by the state under authority delegated pursuant to 33 USC § 1342(b), that authorizes the discharge of pollutants to waters of the United States, whether the permit is applicable on an individual, group or general area-wide basis.

Operate means drive, conduct, work, run, manage or control.

Operator means the person associated with a large or small construction activity that is either a primary operator or secondary operator as defined below:

(1) *Primary operator* means the person associated with a large or small construction activity that meets either of the following two criteria:

a. The person that has operational control over construction plans and specifications, including the ability to make modifications to those plans and specifications; or

b. The person that has day-to-day operational control of those activities at a construction site that are necessary to ensure compliance with a stormwater pollution prevention plan (SWP3) for the site or other permit conditions (e.g., they are authorized to direct workers at a site to carry out activities required by the SWP3 or comply with other permit conditions).

(2) *Secondary operator* means the person whose operational control is limited to the employment of other operators or to the ability to approve or disapprove changes to plans and specifications. The term "secondary operator" is also defined as a primary operator and must comply with the permit requirements for primary operators if there are no other operators at the construction site.

Permittee means the MS4 operator authorized under the TPDES general permit TXR040000, an operator authorized under the TPDES general permit TXR150000 or TPDES general permit TXR050000. The authorization may be gained through submission of a notice of intent, by waiver or by meeting the requirements for automatic coverage to discharge stormwater runoff and certain nonstormwater discharges.

Person means any individual, partnership, copartnership, firm, company, corporation, association, joint stock company, trust, estate, governmental entity or any other legal entity, or their legal representatives, agents or assigns. The term "person" includes all federal, state and local governmental entities.

Point source means any discernible, confined and discrete conveyance, including, but not limited to, any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, landfill leachate collection system, vessel or other floating craft from which pollutants are or may be discharged. The term "point source" does not include return flows from irrigated agriculture or agricultural stormwater runoff.

Pollutant means anything which causes or contributes to pollution. Pollutants may include, but are not limited to: paints, varnishes and solvents; oil and other automotive fluids; nonhazardous liquid and solid wastes and yard wastes; refuse, rubbish, garbage, litter or other discarded or abandoned objects,

ordinances and accumulations, so that same may cause or contribute to pollution; floatables; pesticides, herbicides and fertilizers; hazardous substances and wastes; sewage, fecal coliform and pathogens; dissolved and particulate metals; animal wastes; wastes and residues that result from constructing a building or structure; and noxious or offensive matter of any kind.

Pollution means the alteration of the physical, thermal, chemical or biological quality of, or the contamination of, any water of the state or water of the United States, that renders the water harmful, detrimental or injurious to humans, animal life, vegetation or property, or to the public health, safety or welfare, or impairs the usefulness or the public enjoyment of the water for any lawful or reasonable purpose.

Premises means any building, lot, parcel of land or portion of land whether improved or unimproved, including adjacent sidewalks and parking strips.

Release means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping or disposing into groundwater, subsurface soils, surface soils, the municipal separate storm sewer system (MS4), the water of the state or the waters of the United States.

Special construction sites means any construction activity (e.g., clearing, grading, excavating, etc.) greater than 5,000 square feet and less than one acre of land.

Storm drainage system means facilities by which stormwater is collected and/or conveyed including, but not limited to, any roads with drainage systems, municipal streets, gutters, curbs, inlets, piped storm drains, pumping facilities, retention and detention basins, natural and manmade or altered drainage channels, reservoirs and other drainage structures.

Stormwater means any flow occurring during or following any form of natural precipitation and resulting from such precipitation, including snow melt.

Stormwater discharge, associated with industrial activity, means the discharge from any conveyance that is used for collecting and conveying stormwater and that is directly related to manufacturing, processing or raw materials storage areas at an industrial facility. For the purpose of the industrial general permit, the term "stormwater discharge" includes, but is not limited to, stormwater discharges from industrial plant yards; immediate access roads and rail lines used or traveled by carriers of raw materials, manufactured products, waste material or byproducts used or created by the facility; material handling areas; refuse/waste disposal areas; sites used for the application or disposal of process waste waters; sites used for the storage and maintenance of material handling equipment; sites used for residual treatment, storage or disposal; shipping and receiving areas; manufacturing buildings; storage areas (including tank farms), intermediate products and final products; similar areas where stormwater can contact pollutants related to industrial activity; and areas where industrial activity have taken place in the past and significant materials remain and are exposed to stormwater. For the purposes of this definition, the term "material handling areas" include storage, loading and unloading, transportation or conveyance of any raw material, intermediate product, final product, byproduct or waste product. The term "stormwater discharge" includes discharges from facilities described under the industrial general permit that are operated by federal, state or municipal entities. The term "stormwater discharge" excludes areas located at industrial sites that are separate from the facility's industrial activities, such as office buildings and accompanying parking lots, as long as the drainage from the excluded areas is not mixed with stormwater drained from areas of a facility that are covered by the industrial general permit. For the complete regulatory definition, including the categories of industrial activity, see 40 CFR 122.26(b)(14).

Stormwater pollution prevention plan (SWPPP or SWP3) means a document which describes the best management practices and activities to be implemented by a person or business to identify sources of pollution or contamination at a site and the actions to eliminate or reduce pollutant discharges to stormwater, stormwater conveyance systems and/or receiving waters to the maximum extent practicable.

Texas Commission on Environmental Quality (TCEQ) means the environmental agency for the state.

Texas Pollutant Discharge Elimination System (TPDES) general permit means a permit issued to authorize the discharge of waste into or adjacent to water in the state for one or more categories of waste discharge within a geographical area of the state or the entire state as provided by Texas Water Code § 26.040.

Total suspended solids (TSS) means solids that either float on the surface, or are in suspension in water, wastewater or other liquids, and which are generally removable by a laboratory filtration device. TSS is expressed in milligrams per liter.

Uncontaminated means not containing a harmful quantity of any substance.

Wastewater means any water or other liquid, other than uncontaminated stormwater, discharged from a facility.

Water of the state means groundwater, percolating or otherwise, lakes, bays, ponds, impounding reservoirs, springs, rivers, streams, creeks, wetlands, marshes, inlets, canals inside the territorial limits of the state and all other bodies of surface water, natural or artificial, navigable or nonnavigable, and including the bed and banks of all watercourses and bodies of surface water that are wholly or partially inside or bordering the state or inside the jurisdiction of the state.

Waters of the United States means all waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce; all interstate waters, including interstate wetlands; all other waters the use, degradation or destruction of which would affect or could affect interstate or foreign commerce; all impoundments of waters otherwise defined as waters of the United States under this definition; all tributaries of waters identified in this definition; all wetlands adjacent to waters identified in this definition; and any waters within the federal definition of "waters of the United States" at 40 CFR 122.2; but not including any waste treatment systems, treatment ponds or lagoons designed to meet the requirements of the Federal Clean Water Act.

Wetland means an area that is inundated or saturated by surface water or groundwater at a frequency and duration sufficient to support, and that under normal circumstances, does support a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs and similar areas.

Working days (or business days) means Monday through Friday, excepting legal holidays.

(Code 1961, § 32A-6; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Secs. 125-7—125-30. - Reserved.

ARTICLE II. - ILLICIT DISCHARGES

Sec. 125-31. - Applicability.

This chapter shall apply to all water entering the storm drain system generated on any developed and undeveloped lands within the city limits, unless explicitly exempted by the city or an authorized enforcement agency.

(Code 1961, § 32A-7; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-32. - General prohibitions.

A person commits an offense if the person introduces, or causes to be introduced, into the MS4 any discharge that is not composed entirely of stormwater.

(Code 1961, § 32A-8; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-33. - General prohibition exemptions.

(a) It is an affirmative defense to any enforcement action for a violation of section 125-1 that the discharge was composed entirely of one or more of the following categories of discharges:

(1) A discharge authorized by and in full compliance with, an NPDES and/or TPDES permit (other than the NPDES and/or TPDES permit for discharges from the MS4);

(2) A discharge or flow resulting from firefighting activities (firefighting activities do not include washing of trucks);

(3) A discharge or flow of fire protection water that does not contain oil or hazardous substances or materials that the fire code requires to be contained and treated prior to discharge, in which case treatment adequate to remove harmful quantities of pollutants must have occurred prior to discharge;

(4) A discharge from a fire hydrant flushing;

(5) Incidental discharges from water line pressure release valves;

(6) Uncontaminated runoff or return flow from landscape irrigation, lawn irrigation and other irrigation utilizing potable water, groundwater or surface water sources;

(7) Uncontaminated water used for dust control purposes;

(8) A discharge or flow from a diverted stream flow or natural spring;

(9) A discharge or flow from uncontaminated pumped groundwater or rising groundwater;

(10) Uncontaminated groundwater infiltration (as defined as 40 CPA 35.2005(20)) to the MS4;

(11) Uncontaminated discharge or flow from a foundation drain, crawl space footing drain or sump;

(12) A discharge or flow from a potable water source not containing any harmful substance or material from the cleaning or draining of a storage tank or other container;

(13) A discharge or flow from air conditioning condensation that is unmixed with water from a cooling tower, emissions scrubber, emissions filter or any other source of pollutant;

(14) A discharge or flow from a riparian habitat or wetland;

(15) A discharge or flow from cold water used in street washing that is not contaminated with any soap, detergent, degreaser, solvent, surfactant, emulsifier, dispersant or any other harmful cleaning substance;

(16) Stormwater runoff from a roof that is not contaminated by any runoff or discharge from an emissions scrubber, filter or any other source of pollutant;

(17) Dechlorinated swimming pool discharges;

(18) A discharge or flow from individual residential car washing activities;

(19) Agricultural stormwater runoff;

(20) A discharge or flow from water line flushing, excluding discharges of hyperchlorinated water, unless the water is first dechlorinated and discharges are not expected to adversely affect aquatic life;

(21) A discharge or flow of uncontaminated stormwater pumped from an excavation;

(22) Other allowable nonstormwater discharges listed in 40 CFR 122.26(d)(2)(iv)(B)(1);

(23) Nonstormwater discharges that are specifically listed in the TPDES multisector general permit (MSGP) or the TPDES construction general permit;

(24) Other similar occasional incidental nonstormwater discharges, unless the TCEQ develops permits or regulation addressing these discharges;

(25) Discharges specified in writing by the city as being necessary to protect public health and safety;

(26) Dye testing is an allowable discharge, but requires a verbal notification to the city prior to the time of the test; and

(27) Any nonstormwater discharge permitted under a TPDES permit, waiver or waste discharge order issued to the discharger and administered under the authority of the TCEQ, provided that the discharger is in full compliance with all requirements of the permit, waiver or order and other applicable laws and regulations, and provided that written approval has been granted from the director for any discharge to the storm drain system.

(b) No affirmative defense is available under subsection (a) of this section if the discharge or flow in question has been determined by the director to be a source of a pollutant to the MS4 or to the waters of the United States, written notice of that determination and to cease the discharge has been provided to the discharger and the discharge has continued after the expiration of the time given in the notice to cease the discharge. The director's determination that a discharge is a source of a pollutant may be reviewed in any administrative or judicial enforcement proceeding.

(c) Prohibition of illicit connections.

(1) The construction, use, maintenance or continued existence of illicit connections to the storm drain system is prohibited.

(2) This prohibition expressly includes, without limitation, illicit connections made in the past, regardless of whether the connection was permissible under law or practices applicable or prevailing at the time of connection.

(3) A person is considered to be in violation of this chapter if the person connects a line conveying sewage to the MS4 or allows such a connection to continue.

(d) A person commits an offense if the person introduces, or causes to be introduced, into the MS4 any harmful quantity of any substance.

(Code 1961, § 32A-9; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-34. - Specific prohibitions and requirements.

The specific prohibitions and requirements in this section are not inclusive of all the discharges prohibited by this chapter.

(1) No person shall recklessly introduce, or cause to be introduced, into the MS4 any discharge that causes or contributes to causing the city to violate a water quality standard, the city's TPDES permit or any other discharge permit for discharges from its MS4.

(2) It shall be a violation of this chapter for any person to intentionally deposit, discharge, dispose, drain, dump, emit, empty, leak, leach, pump, pour, spill, throw or otherwise introduce or cause to be introduced into the MS4, or any storm sewer manhole, catchbasin, private drain, ditch, street, gutter, creek, stream, tributary or any other drainage device which connects with or drains into the MS4, any of the following described materials or substances within the city limits:

a. Any oil, antifreeze or any other motor vehicle fluid;

b. Any industrial waste;

c. Any direct discharge of concrete truck washout water;

d. Any hazardous waste, including hazardous household waste;

e. Any domestic sewage or septic tank waste, grit trap waste or grease trap waste;

f. Any wastewater from a commercial carwash facility; from any vehicle washing, cleaning or maintenance at any new or used automobile or other vehicle dealership, rental agency, body shop, repair shop, maintenance facility or automotive-related facility; or from any washing, cleaning or maintenance of any business or commercial or public service vehicle, including a truck, bus or heavy equipment, by a business that operates more than two such vehicles;

g. Any wastewater from a commercial mobile power washer or from the washing or other cleaning of a building exterior that contains any soap, detergent, degreaser, solvent or any other harmful cleaning substance;

h. Any wastewater from commercial floor, rug or carpet cleaning;

i. Any commercial runoff or wash-down water from any animal pen, kennel or fowl or livestock containment area;

j. Any filter backwash from a swimming pool or fountain, without the backwash first being filtered through a water-filtering device;

k. Any wastewater from street washing or other cosmetic cleaning that contains any soap, detergent, solvent, degreaser, emulsifier, dispersant or any other harmful cleaning substance; or any wastewater from the wash-down or other cleaning of any pavement where any spill, leak or other release of oil, motor fuel or other petroleum or hazardous substance has occurred, unless all harmful quantities of such released material has been previously removed;

l. Any effluent from a cooling tower, condenser, compressor, emissions scrubber, emissions filter or the blow down from a boiler;

m. Any substance or material that will damage, block or clog the MS4;

n. Any intentional disposal of garbage, rubbish, grass clippings, leaves or other vegetation into any gutter, street, sidewalk, inlet or other drainage device that connects with or drains into the MS4;

o. Super chlorinated potable water from water line flushing and disinfection;

p. Any acid waste materials or alkaline waste materials;

q. Any water or waste containing fats, oils, grease, free-floating or insoluble oil;

r. Any gasoline, naphtha, fuel oil, mineral oil or other flammable or explosive liquid, solid or gas;

s. Any noxious, malodorous, poisonous or reactive substance which, either singularly or by interaction with other substances or by its accumulation in the MS4 becomes injurious or potentially injurious to human, plant or animal life or property;

t. Any fire protection water containing oil or hazardous substances or materials that the fire code in this Code requires to be contained and treated prior to discharge, unless treatment adequate to remove pollutants occurs prior to discharge (this prohibition does not apply to discharges or flow from firefighting by the fire department);

u. Any water from a water curtain in a spray room used for painting vehicles or equipment;

v. Any contaminated runoff from a vehicle wrecking yard;

w. Any release from a petroleum storage tank (PST); any leachate or runoff from soil contaminated by a leaking PST; or any discharge of pumped, confined or treated wastewater from the remediation of any such PST release, unless the discharge is in compliance with all state and federal standards and requirements and does not contain a harmful quantity of any pollutant;

x. Any pavement wash water from a service station, unless such wash water has passed through a properly functioning and maintained, grease, oil and sand interceptor before discharge into the MS4;

y. Any harmful quantity of concrete, asphalt, sediment, silt, earth, soil or other material associated with clearing, grading, excavation or other construction activities in excess of what could be retained on site or captured by employing sediment and erosion control measures to the maximum extent practicable;

z. Pesticides, herbicides and fertilizers regulated as follows:

1. No person shall use or cause to be used any pesticide, herbicide or fertilizer in any manner that the person knows, or reasonably should know, is likely to cause, or does cause, a harmful quantity of the pesticide, herbicide or fertilizer to enter the MS4 or waters of the United States;

2. No person shall dispose of, discard, store or transport a pesticide, herbicide or fertilizer or a pesticide, herbicide or fertilizer container, in a manner that the person knows, or reasonably should know, is likely to cause, or does cause, a harmful quantity of the pesticide, herbicide or fertilizer to enter the MS4 or waters of the United States;

3. Any license, permit, registration certification or evidence of financial responsibility required by state or federal law for sale, distribution, application, manufacturer transportation, storage or disposal of a pesticide herbicide or fertilizer must be presented to the director or the directors delegate and any city law enforcement officer for examination upon request;

4. No person shall use or cause to be used any pesticide or herbicide contrary to any directions for use on any labeling required by state or federal statute or regulation;

aa. Used oil regulated as follows:

1. It shall be a violation of this chapter for a person to:

(i) Intentionally discharge or dispose of used motor vehicle fluids, including motor oil and antifreeze, into the MS4 or a sewer, drainage system, septic tank, surface water, groundwater or watercourse;

(ii) Knowingly mix or commingle used oil with solid waste that is to be disposed of in a landfill or directly dispose of used oil on land or in a landfill; or

(iii) Intentionally apply used oil to a road or land for dust suppression, weed abatement or other similar use that introduces used oil into the environment;

2. All businesses that change motor oil for the public and municipal waste landfills are encouraged to serve as publicly used oil collection centers as provided by of the Texas Health and Safety Code § 371.024;

bb. Erosion control regulated as follows:

1. It is unlawful for any person having control of real property in the city to suffer or permit soil, rock, mud or debris to wash, slide or otherwise be moved from the real property onto any adjacent property, street, alley, utility facility, right-of-way or easement through erosion;

2. Any person in control of real property shall:

(i) Prevent soil, mud, rock or debris from being deposited on or transported through erosion to any adjacent property, street, alley, utility facility, right-of-way or easement;

(ii) Inspect the property and acquaint oneself with the conditions existing; and

(iii) Remedy any condition that might allow soil, mud, rock or debris to wash, slide or otherwise be transported to any adjacent property, street, alley, utility facility, right-of-way or easement through erosion.

(Code 1961, § 32A-10; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-35. - Watercourse protection.

Any person owning property through which a watercourse passes and such person's lessee, if any, shall keep and maintain that part of the watercourse within the property free of trash, debris and other obstacles that would pollute, contaminate or retard the flow of water through the watercourse. In addition, the owner and lessee, if any, shall maintain existing privately owned structures within or adjacent to a watercourse, so that such structures will not become a hazard to the use, function or physical integrity of the watercourse. The property owner and lessee, if any, shall provide protection against stream bank erosion by maintaining existing vegetation adjacent to watercourses.

(Code 1961, § 32A-11; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-36. - Suspension of MS4 access.

(a) Suspension due to illicit discharges in emergency situations. The city may, without prior notice, suspend MS4 discharge access to a person when such suspension is necessary to stop an actual or threatened discharge which presents or may present imminent and substantial danger to the environment, the health or welfare of persons or the MS4 or waters of the United States. If the violator fails to comply with a suspension order issued in an emergency, the city may take such steps as deemed necessary to prevent or minimize damage to the MS4 or waters of the United States or to minimize danger to persons.

(b) Suspension due to the detection of illicit discharge. Any person discharging to the MS4 in violation of this chapter may have their MS4 access terminated if such termination would abate or reduce an illicit discharge. The city will notify a violator of the proposed termination of its MS4 access. The violator may petition the city for a reconsideration and hearing.

(c) A person commits an offense if the person reinstates MS4 access to premises terminated pursuant to this section, without the prior approval of the city.

(Code 1961, § 32A-12; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Secs. 125-37—125-60. - Reserved.

ARTICLE III. - STORMWATER MANAGEMENT PROCEDURES

Sec. 125-61. - Stormwater discharges associated with construction activity, including industrial activity.

(a) *Applicability.* This chapter applies to all facilities and construction sites, including special construction sites, located within the city limits or otherwise subject to the regulatory authority of the city that have stormwater discharges associated with regulated industrial and/or construction activity by TPDES or NPDES permit requirements, and/or other construction activities determined by the city to pose a hazard to the quality of water flowing through the MS4. This includes the construction of an entry/exit location, drill pad site, utility and other construction activities as required for exploration and/or extraction of natural gas, other petroleum products or any other minerals within city limits.

(b) *Access to facilities.*

(1) The director is authorized by section 125-94 to enter and inspect all facilities and construction sites subject to regulation under this chapter.

(2) Site owners and/or operators shall allow the director ready access to all parts of public and private premises for the purposes of inspection, sampling, examination and copying of records that must be kept under the conditions of an NPDES or TPDES permit to discharge stormwater and the performance of any additional duties as defined by state and federal law.

(3) The director shall have the right to set up on any permitted construction site or facility such devices as are necessary in the opinion of the director to conduct monitoring and/or sampling of the facility's or construction site's stormwater discharge.

(4) Any temporary or permanent obstruction to safe and easy access to the site to be inspected and/or sampled shall be promptly removed by the operator at the written or oral request of the director and shall not be replaced. The costs of clearing such access shall be borne by the operator.

(5) Unreasonable delays in allowing the director access to a permitted construction site or facility are a violation of a stormwater discharge permit and of this article. A person who is the owner and/or operator of a facility and/or construction site with an NPDES or TPDES permit, or site qualified to be covered by an NPDES or TPDES permit, to discharge stormwater associated with construction activity or industrial activity commits an offense if the person denies the director reasonable access to the permitted facility or construction site for the purpose of conducting any activity authorized or required by this chapter.

(6) If the city has been refused access to any part of the premises from which stormwater is discharged, and the director is able to demonstrate probable cause to believe that there may be a violation of this chapter or any state or federal discharge permit, limitation or requirement, or that there is a need to inspect or sample as part of a routine inspection and sampling program of the city designed to verify compliance with this chapter or any order issued hereunder, or to protect the overall public health, safety and welfare of the community, then the city may seek issuance of a search warrant from any court of competent jurisdiction.

(c) *Damage to stormwater control measures.* It is a violation of this chapter for any person to damage, or allow to be damaged, any temporary or permanent stormwater control measures, through the persons actions or inaction without promptly restoring the control measure to an effective and efficient state.

(d) *Nonpermitted discharges prohibited.* A person who is the owner and/or operator of a construction site commits an offense if the person discharges, or causes to be discharged, stormwater associated with construction activity without first having obtained a NPDES or TPDES permit to do so, unless a permit is not required by a state or federal requirement.

(e) *Compliance with permit.*

(1) A facility or construction site shall be operated in strict compliance with the requirements of the subject TPDES permit to discharge stormwater associated with industrial or construction site activity.

(2) A person commits an offense if the person operates a facility or construction site in violation of the requirements of the subject NPDES/TPDES permit to discharge stormwater associated with industrial or construction site activity.

(f) *Stop work order (SWO).*

(1) Whenever the director finds that any operator of a facility, has violated, or continues to violate, any provision of this chapter, or any permit or order issued thereunder, the director may order that a stop work order be issued to the operator, posted at the facility and distributed to all city departments and divisions whose decisions affect any activity at the site.

(2) Whenever the director determines that the operation of a construction site has violated, or continues to violate, any provision of this chapter, or any order issued hereunder, as it may pertain to the operation of the construction site, the director may order that a SWO be issued to the owner and/or operator, posted at the site and distributed to all city departments and divisions whose decisions affect any activity at the site.

(3) Unless express written exception is at issuance, the stop work order shall prohibit any further construction activity at the entire site and shall bar any further inspection or approval by the city.

(4) A person receiving an order under this section may file a written notice of appeal with the director, no later than the tenth day after receipt of the order. Such notice shall include an explanation as to why the person believes the enforcement action should not be taken.

(5) Issuance of a stop work order shall not be a bar against, or a prerequisite for, taking any other action against the violator.

(Code 1961, § 32A-13; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-62. - Stormwater discharges from industrial activity.

(a) *General provisions.* All operators of:

(1) Municipal landfills;

(2) Other treatment, storage, or disposal facilities for municipal waste, including, but not limited to, transfer stations and incinerators;

(3) Hazardous waste treatment, storage, disposal and recovery facilities;

(4) Industrial facilities that are subject to section 313 of title III of EPCRA; and

(5) Industrial or commercial facilities that the director reasonably determines are contributing a substantial pollutant loading to the MS4, which are sources of stormwater discharges associated with industrial activity;

Shall comply with the following requirements:

(1) Any operator requiring coverage for stormwater discharge associated with industrial activity under the TPDES general permit for stormwater discharges associated with industrial activity (Industrial General Permit No. TXR050000) shall submit a signed copy of its notice of intent (NOI) to the director contemporaneously with submittal of the original NOI to the TCEQ. If industrial activity is already underway, the NOI shall be submitted to the director, or an authorized representative, within 30 days from the effective date of this chapter.

(2) If relevant information provided in the NOI changes, a notice of change (NOC) must be prepared and implemented in accordance with the requirements of the industrial general permit or any individual or group TPDES permit issued for stormwater discharges from the facility. A copy of the NOC must be provided to the director within 14 days of discovery of the change.

(3) Where all stormwater discharges associated with industrial activity that are authorized by this chapter, and by the TPDES permit for those discharges from industrial activities are eliminated, or where the operator of stormwater discharges associated with industrial activity at a facility changes, the operator of the facility shall submit to the director a notice of termination (NOT) that includes the information required for notices of termination by part II.C.6 of the industrial general permit.

(4) The city's MS4 permit requires that all industrial facilities listed in section 125-6 be subject to site inspections no less frequently than once per permit term (five years). The director retains the authority to inspect these industrial facilities as often as deemed necessary to ensure permit compliance and safety of the MS4 and surface waters of the United States.

(5) Qualified personnel are required to inspect the facility according to the requirements of the Industrial General Permit part III.B. A copy of the report and all documentation must be submitted to the director.

(6) Industrial or commercial facilities that the director determines are contributing a substantial pollutant load to the MS4 shall submit self-monitoring data to the city on an annual basis. Submittal date of self-monitoring data shall be determined by the director.

(7) An industrial facility may submit a "no exposure" certification to the city in lieu of self-monitoring; however, any facility operating under a "no exposure" certification is subject to periodic facility inspections (not less than once per permit term (five years) to verify the facilities "no exposure" exemption). The inspection may be waived by the city for facilities that participate

in the TCEQ's small business and local government assistance compliance commitment program.

(8) The director retains the authority to conduct inspections on any industrial facility subject to the TCEQ's TPDES multisector general permit or has been deemed to be, or has potential to be, contributing a substantial pollutant load to the MS4 in order to determine compliance and ensure safety of the MS4 and waters of the United States.

(9) Operators must submit monitoring results to the director upon the director's request for discharges subject to the semiannual or annual monitoring requirements of part III of the TCEQ industrial general permit TXR050000.

(10) Copies of the NOI, NOC, NEC, NOT may be delivered to the director either in person or by mailing it to:

Stormwater Management Division

P.O. Box 1967

Texarkana, Texas 75504

(11) A person commits an offense if the person owns or operates a construction site or industrial facility that is discharging stormwater associated with a regulated construction or industrial activity without having submitted a copy of the notice of intent to do so to the city.

(b) *Facilities operating with a TPDES or NPDES individual permit.*

(1) The facility shall operate in accordance with all requirements of the appropriate TPDES or NPDES individual permit.

(2) Upon inspection of the facility, the director may notify the operator or owner at any time that facility operations do not meet the requirements of the appropriate TPDES or NPDES individual permit or any additional requirements imposed by or under this section or other city ordinances. Such notification shall be in writing and shall identify those provisions of the permit or ordinance that are not being met, and clearly identify the changes necessary to meet such requirements. Within 30 calendar days of such notification from the director, the operator or owner shall make the required changes and submit to the director a written certification that the changes have been implemented. If compliance is not achieved to the city's satisfaction, the city may, in its discretion, report the noncompliance to the EPA and/or the TCEQ, and/or the city may itself undertake any enforcement action authorized by sections 125-91 or 125-93. Exercise of the city's option for consultation under this subsection shall not be a bar against, or prerequisite for, taking any other enforcement action against any owner or operator of the facility.

(3) Copies of all sampling data and analyses reports required by the appropriate TPDES or NPDES individual permit shall be submitted to the director at the same time that such reports are submitted to the EPA or TCEQ, unless otherwise notified in writing by the director.

(c) *Requirements to prevent, control and reduce stormwater pollutants by the use of best management practices.*

(1) The city will adopt requirements identifying best management practices for any activity, operation or facility which may cause or contribute to pollution or contamination of stormwater, the storm drain system or waters of the United States.

(2) The owner and/or operator of a commercial or industrial establishment shall provide, at their own expense, reasonable protection from accidental discharge of prohibited materials or other wastes into the municipal storm drain system or watercourses through the use of these structural and nonstructural BMPs. Further, any person responsible for a property or premise, which is, or may be, the source of an illicit discharge, may be required to implement, at said person's expense, additional structural and nonstructural BMPs to prevent the further discharge of pollutants to the municipal separate storm sewer system. Compliance with all terms and conditions of a valid NPDES or TPDES permit authorizing the discharge of stormwater

associated with industrial activity, to the extent practicable, shall be deemed compliance with the provisions of this section. These BMPs shall be part of a stormwater pollution prevention plan (SWP3) as necessary for compliance with requirements of the NPDES or TPDES permit.

(3) The director may require an owner and/or operator of a regulated facility to modify its BMPs if, in the best professional judgment of the director, the BMPs do not provide effective protection from accidental discharge of prohibited materials or other wastes from entering into the municipal stormwater drainage system or waters of the United States.

(4) The director may require any operator of a facility to modify the facility's stormwater pollution prevention plan if in the best professional judgment of the director, the SWP3 does not comply with the requirements of the facility's NPDES or TPDES permit or this chapter to discharge stormwater associated with industrial activity.

(5) The deficiencies in a facilities' BMPs will be communicated in writing, and the director will provide the owner and/or operator a reasonable amount of time, not to exceed 60 days, to make the necessary changes in the BMPs. permit time requirements for controlling pollutants in runoff shall remain applicable.

(Code 1961, § 32A-13.1; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-63. - Construction stormwater management.

(a) *General provisions; construction related violations.* No person shall construct, enlarge, alter, repair or maintain any grading, excavation or fill, or cause the same to be done, contrary to or in violation of any terms of this chapter. Any person violating any of the provisions of this chapter shall be deemed guilty of a misdemeanor and each day during which any violation of any of the provisions of this chapter is committed, continued or permitted, shall constitute a separate offense. In addition to any other penalty authorized by this section, any person, partnership or corporation convicted of violating any of the provisions of this chapter shall be required to bear the expense of such restoration. Violations include, but are not limited to, the following:

(1) Construction not conducted in accord with the requirements of this chapter shall be a deemed a violation of this chapter;

(2) Construction not initiated or terminated within the time frame authorized by the director by notice, permit or license when such authorization is required by this chapter, shall be a violation of this chapter;

(3) It shall be a violation of this chapter to not comply with requirements for timely application for a stormwater permit and requirements for a stormwater pollution prevention plan and/or an erosion and sediment control plan;

(4) Conducting any land disturbing or construction activity without an approved erosion control plan for the location where the violation occurred;

(5) Failing to install erosion control devices or to maintain erosion control devices throughout the duration of land disturbing activities, in compliance with the approved erosion control plan for the location where the violation occurred;

(6) Failing to remove off-site sedimentation that is a direct result of land disturbing activities where such off-site sedimentation results from the failure to implement or maintain erosion control devices as specified in an approved erosion control plan for the location where the violation occurred;

(7) A person commits an offense if the person owns or operates a construction site or industrial facility that is discharging stormwater associated with a regulated construction or industrial activity without having submitted a copy of the notice of intent to do so to the city.

(b) *Establishment of stormwater permit.* A stormwater permit is required to ensure conformance with the requirements of this chapter prior to any land disturbing activity, including but not limited to, clearing, dredging, grading, excavating, transporting, storing, stockpiling, mining, disposing and filling of soil, earthen materials or land.

(c) *Regulatory permits.* It shall be the private property owner's, developer's or builder's responsibility to secure all regulatory permits associated with development drainage improvements and/or any land disturbing activities. These include, but are not limited to, the U.S. Corps of Engineer 404 permits, TCEQ permits and the U.S. Environmental Protection Agency discharge permits.

(d) *Construction sites.*

(1) *Applicability/site limits.* This chapter shall apply to all areas of land within the city limits. The erosion control provisions of this chapter do not apply to land under active agricultural use. As soon as construction or modification to the lands under active agricultural use is proposed so that the use of land will change from agriculture to any other use, then the provisions of this chapter shall be applicable to the once exempted land. Subsection (g)(6) of this section explains this exemption in greater detail. A construction site is the location and all the areas wherein construction activity, which is all or part of a common development or project, are occurring, proposed to occur, or have occurred, irrespective of whether that construction is in compliance with this chapter, irrespective of whether that construction activity is ongoing or temporarily suspended for any purpose and irrespective of whether the director has granted authorization to undertake the construction activity. For purposes of this chapter, a construction site shall encompass:

a. All land and surface water areas where the construction activities of any type, including all areas of land surface disturbed by or as a consequence of the construction activities or other activities in support of the construction activities, are undertaken as part of a common plan of development or project;

b. All areas of land to be disturbed by construction of a common plan of development or project, irrespective of whether such construction is undertaken or planned to be undertaken in one phase or stage or different phases or stages and irrespective of whether such construction is undertaken or planned to be undertaken at different, separate or simultaneous times;

c. All areas of land where the land is to be disturbed by construction of a common plan of development or project, irrespective of whether untaken at contiguous or separate locations within the general area encompassed by the common plan of development or project, provided such boundary lies on or is within the boundary of property collectively owned or leased by one or more parties undertaking any or all of the construction activities; and

d. All areas of ongoing, temporarily suspended, yet-to-be undertaken and completed construction encompassing the totality of the construction activities, irrespective of whether any or all the construction activities are within compliance with this chapter.

(2) *Redefining of construction site limits.* The director shall have the right to redefine, for purposes of compliance with this chapter, the limits of a construction site in the extent and amount necessary and sufficient in the judgment of the director to prevent the actual or potential discharge of pollutants from the construction site to the MS4 or waters of the U.S. to the maximum extent practicable, provided the limits so defined lies on or within the boundary of property collectively owned or leased by one or more operators undertaking any or all of the construction activities at the site.

(3) *Cessation of construction site.* A construction site shall, for the purposes of this chapter, cease to be a construction site only at such time that all requirements for closure of the construction site as specified by this chapter have been met.

(e) *Operators and applicants.*

(1) *Operator responsibility.* A construction operator shall be fully responsible for compliance with all requirements of this chapter for construction activities, as may be applicable to the type of construction activities being conducted, proposed to be conducted or that have been conducted by the operator at a construction site, including, but not limited to, making application for a stormwater permit, preparing a stormwater pollution prevention plan and/or ESCP and performing closure of the construction site.

a. All secondary operators and primary operators with control over construction plans and specifications must:

1. Ensure the project specifications allow or provide that adequate BMPs are developed to meet the requirements of this chapter and part III of the construction general permit;

2. Ensure that the SWP3 indicates the areas of the project where they have control over project specifications, including the ability to make modifications in specifications;

3. Ensure all other operators affected by modifications in project specifications are notified in a timely manner so that those operators may modify their best management practices as necessary to remain compliant with the conditions of this chapter and the construction general permit;

4. Ensure that the SWP3 for portions of the project where they are operators indicates the name and site-specific TPDES authorization numbers for permittees with the day-to-day operational control over those activities necessary to ensure compliance with the SWP3 and other permit conditions. If the party with day-to-day operational control has not been authorized or has abandoned the site, the person with control over project specifications is considered to be the responsible party, until the authority is transferred to another party and the SWP3 is updated.

b. *Change in operator.*

1. In the event that the operator of the construction site changes, all or in part, any and all stormwater permits and stormwater pollution prevention plans for construction yet to be completed, must name the new and continuing operators' names. Any permits, plans or notices that have been issued or approved by the city for the construction to the original operator must be reissued or reapproved, as appropriate, with the names of the new operators in the same manner as the original operator, such reissuance or reapproval being obtained no later than ten working days after such change.

2. If there is a transfer of ownership from the applicant to an owner occupant of a residential lot covered by a TPDES permit than a final inspection will be required. The applicant will also be required to submit documentation that the resident has been made aware of the requirements for proper stabilization of any remaining unstabilized portion of the residential lot.

(2) *Applicant.* For the purpose of any applications for construction activities that may be required by this chapter, an applicant is the person making such application and is an operator at the property upon which construction is proposed or is taking place.

(3) *Division of responsibility.* In the event the operator of a construction site is more than one legal entity, the applicant shall be considered responsible and held liable for complying with this chapter.

(f) *Construction activities.*

(1) *Types of construction activities.* Construction activities are those activities which result in any land disturbing activity or exposure of raw soil on a temporary or permanent basis and may include, but are not necessarily limited to, one or more of the following activities or practices when such activities are done for the purposes of:

a. Smoothing;

b. Clearing;

c. Removing trees and vegetation;

d. Configuring or shaping the land surface or subsurface;

e. Modifying drainage, drainage patterns, drainage conveyances or drainage facilities;

f. Removing, replacing, expanding, altering, destroying or demolishing existing structures, surfaces or facilities;

g. Preparing the land for construction of roads, highways, curbs, gutters, drainage devices, vehicle parking, buildings, structures, walls, roofs, floors, pads, foundations, tanks, basements, pipes or utilities.

(2) *Construction conduct.*

a. Any construction at a construction site shall be performed so as to reduce, to the maximum extent practicable, the discharge of sediments and other pollutants from the construction site.

b. An owner and/or operator of a construction site shall maintain on-site and make available for inspection by the director, any notice permit or license for construction and any pollution control plan that may be required by this chapter or other state or federal regulation.

c. A stormwater pollution prevention plan and/or an erosion and sediment control plan shall be submitted to, and approved by, the director prior to commencement of any construction activity at a construction site for which a stormwater permit is required.

d. The director shall require that a construction site of any size conform to any and all conditions of this chapter for construction activities if the director determines that such requirements are necessary to prevent a significant discharge of pollutants to the city's MS4 or waters of the United States or are necessary because of imminent harm to the public or the environment.

(3) *Closure and final stabilization of construction sites.*

a. *Closure activities.* Construction activities at a site, for the purposes of this chapter, shall not be complete until proper closure of the site has been accomplished. Until such time proper closure has been achieved, the operator of the site is subject to all applicable requirements for conduct and completion of construction activities at the construction site. Any operator of a construction site shall complete all construction activities at a construction site in compliance with the requirements of this chapter for proper closure.

b. *Proper closure.* Proper closure includes, but is not limited to, the following:

1. Final stabilization of the site;

2. Removal of all construction surplus and residual materials, supplies, packaging, drums, cans and containers;

3. Removal of all surplus and residual soaps, cleaners, pastes, mastics, solvents, materials for soil amendment or preparation and similar construction materials;

4. Removal of all excess, surplus and unused construction vehicle maintenance fluids, including lubricants, fuels, brake fluids and coolants;

5. Removal of all wastes, trash and debris;

6. Removal of any waste bins, enclosures, drums or similar containers which are not intended to serve as permanent waste storage containers at the site;

7. Removal of all temporary stormwater pollution control devices, structures and materials;

8. If not intended for removal in county-approved plans or specifications for the site and to the extent a construction operator, or their activities, are responsible for the

damage or loss of function or capacity of stormwater conveyances and appurtenances:

(i) Repair or replacement of damaged stormwater conveyances and appurtenances;

(ii) Repair or replacement of damaged drainage works and facilities; and

(iii) Restoration of proper function and capacity of stormwater conveyances.

(4) *Inactive construction sites.* A construction site for which active and ongoing on-site construction activities have halted for a period of 30 continuous calendar days and for which proper closure actions as required by this chapter have not been conducted, shall be considered in violation of this chapter, unless the construction site owner and/or operator has demonstrated to the satisfaction of the director that:

a. Such lack of active and ongoing on-site construction activity is a result of only temporary suspension of activities; and

b. Site conditions are and will be maintained in a condition satisfactory to prevent the discharge of pollutants to the city's MS4 or waters of the United States to the maximum extent possible during the period of temporary suspension of construction activities.

(g) *Stormwater permit.*

(1) *Applicability.*

a. Unless specifically exempted in writing, a stormwater permit must be obtained from the director prior to commencement of any construction, development, excavating, grading, regrading, landfilling, berming, paving, diking, clearing and grubbing or any land disturbing activities made to any property within the city. A separate permit is required for each separate, noncontiguous site or lot. The permit application and required submittal documents, when applicable, shall include a copy of the permit coverage and/or site notice for small or large construction sites issued from the TCEQ. Approvals shall be secured per size of development from the city and TCEQ, as applicable prior to starting any clearing or earth work. It is the developer's responsibility to determine if other permits are required and to secure them.

b. In addition, no stormwater permit will be issued for land disturbing activity that would require the uncovering or disturbance of 5,000 square feet or more of land without the approval of an erosion and sediment control plan by the director.

(2) *General provisions.*

a. A stormwater permit application shall be submitted to the director using appropriate forms as provided.

b. A stormwater permit authorizes a construction owner and/or operator to conduct construction activities. Obtaining a stormwater permit does not relieve an owner and/or operator of complying with any and all applicable requirements of this chapter, exclusive of those dealing with construction.

c. Application for a stormwater permit shall require the submission of a stormwater pollution prevention plan (SWP3) and/or an erosion and sediment control plan developed in accordance with the requirements of subsection (h) of this section and the construction general permit to the director for review, such plan shall provide information that will reduce the discharge of pollutants from the site to the maximum extent practicable.

d. The stormwater permit must be obtained from the director at least two working days prior to commencement of construction. Only that construction activity which is described in the stormwater permit can be undertaken.

e. The stormwater permit shall be posted at the construction site, and no construction activity can occur prior to the date of commencement, or after the date of termination, authorized by the stormwater permit.

f. Construction must be started no later than 180 calendar days after the date of commencement of constructions specified in the stormwater permit. Failure to begin construction within the specified time frame will render the stormwater permit void.

g. If for any reason the stormwater permit is suspended, revoked, terminated or voided, construction activity at the site shall immediately cease.

(3) *Contents of a stormwater permit.*

a. The address or other description of location of the construction site.

b. Name and address of the construction site owner, developer and/or operator, either property owner or lessee, and name and address of general construction contractor, if different from property owner or lessee, and name and address of any consulting firm retained by the applicant.

c. Name, address and business telephone number of the construction site owner and/or operator's on-site representative.

d. Earliest date of commencement of construction activity.

e. Proposed dates of termination of construction activity, completion of final stabilization activities and closure of the site.

f. Practices to be employed for site stabilization during the course of the construction.

g. Description of means by which the site is to be stabilized during suspension of construction activity for periods of 14 or more days and permanently stabilized by the time of completion of construction activities.

h. Any other information the director may deem necessary, whether or not required of any other owner and/or operator making application for a stormwater permit.

i. Certification by the applicant for the stormwater permit that the information provided on the stormwater permit application is true and accurate.

j. The approved stormwater permit shall contain certification by the applicant that all land clearing, construction, development and drainage will be done according to the stormwater pollution prevention plan and/or erosion and sediment control plan or previously approved revisions. Any and all stormwater permits may be revoked at any time if the construction of stormwater management facilities is not in strict accordance with approved plans.

k. In addition to the plans and permits required from the city, applicants shall obtain all state and federal permits for the proposed development. The applicant shall also be responsible for determining the existence and limits of any wetlands and/or floodways as may be applicable and be responsible for securing permits and approvals from the U.S. Army Corps of Engineers and Federal Emergency Management Agency as required.

(4) *Amendment to stormwater permit.*

a. If the activity authorized by the permit is not completed according to the approved schedule and permit conditions, the director shall be notified. For revisions resulting in a schedule extension of more than 30 days, or if deviations from the permit conditions are expected to occur, approval of a permit modification is required by the director.

b. If the application for amendment to a stormwater permit requires a change in the stormwater pollution prevention plan and/or erosion and sediment control plan in order for the SWP3 and/or erosion and sediment control plan to remain true and accurate should construction be undertaken in accordance with the amendment, an appropriately modified SWP3 and/or erosion and sediment control plan shall also be provided at the time of application for amendment to the director.

c. Application for amendment to a stormwater permit can be made at any time ten or more working days prior to the time identified in the stormwater permit for completion of

construction activities, provided the person making application is not in violation of this chapter.

(5) *Late filing of amendment to a stormwater permit.*

a. If application for amendment to a stormwater permit is made less than two working days prior to the time for which the activities or conditions described by the amendment are to occur, exist or come about, and such activities or conditions are not authorized by the stormwater permit prior to application for amendment, the application shall be deemed to be a late filing of stormwater permit amendment.

b. A late filing of stormwater permit amendment shall meet all the same conditions and requirements as an application submitted more than two working days prior to the time for which the activities or conditions described by the amendment are to occur, exist or come about, and include other such information the director may require.

c. Construction to be undertaken in accord with a late filing of stormwater permit amendment shall not be undertaken, until such amendment is approved by the director.

d. Approval by the director of a late filing of stormwater permit amendment shall not relieve the applicant from any or all administrative enforcement remedies, judicial enforcement remedies, enforcement actions or other remedies allowed by this chapter.

(6) *Exemptions.* The following activities are exempt from requirements of this chapter:

a. Land use for agricultural purpose;

b. Land where timber extraction takes place, provided that it is to be reseeded as timber land;

c. Existing commercial and industrial structures where additional structural improvements are less than 5,000 square feet;

d. Any activity directly related to the planting, growing and harvesting of agricultural crops;

e. Action taken under emergency conditions, either to prevent imminent harm or danger to persons, or to protect property from imminent danger of fire, violent storms or other hazards;

f. Customary and incidental routine grounds maintenance, landscaping and home gardening which does not require a platting, replatting or building permit and which does not affect stormwater drainage on or through the site;

g. Installation, maintenance and repair of any underground public utility lines when such activity occurs on an existing hard-surface road, street or sidewalk, provided, the activity maintains pollution control and is confined to the area of the road, street or sidewalk which is hard-surfaced; and

h. Construction, repair or rebuilding of tracks of a railroad company.

(7) *Review and approval process.*

a. The director will review each application for a permit to determine its conformance with the provisions of this local regulation. Within ten working days after receiving an application, the city shall, in writing:

1. Approve the application for the permit;

2. Approve the permit application subject to such reasonable conditions as may be necessary to secure substantially the objectives of this regulation and issue the permit subject to these conditions; or

3. Disapprove the permit application, indicating the deficiencies and the procedure for submitting a revised application and/or submission.

b. If the permit application, final stormwater pollution prevention plan and/or erosion and sediment control plan and maintenance agreement are approved by the director, all appropriate land disturbance activity permits shall be issued.

c. Failure of the director to act on original or revised applications under this chapter within ten calendar days of receipt, shall authorize the applicant to proceed in accordance with the plans as filed, unless such time is extended by agreement between the applicant and the city.

(8) *Permit duration.* A construction sites permit is terminated automatically when all of the requirements listed under subsection (f)(3) of this section are met. Unless revoked or otherwise modified, permit coverage will automatically terminate two years after the permit issuance date. If continued, the permit is needed beyond the termination or expiration date, a new stormwater permit must be issued.

(h) *Requirements and standards for site development.*

(1) *Construction sites defined.*

a. Large construction sites include any construction activity that will result in the disturbance (e.g., clearing, grading, excavating, etc.) of five or more acres of total land area. Large construction activity also includes the disturbance of less than five acres of total land area that is part of a larger common plan of development or sale, if the larger common plan will ultimately disturb equal to or greater than five acres of land.

b. Small construction sites include any construction activity that will result in the disturbance (e.g., clearing, grading, excavating, etc.) of one acre and less than five acres of land. Small construction activity also includes the disturbance of less than one acre of total land area that is part of a larger common plan of development or sale if the larger common plan will ultimately disturb equal to or greater than one and less than five acres of land.

c. Special construction sites include any construction activity that will result in the disturbance (e.g., clearing, grading, excavating, etc.) of 5,000 square feet of land and less than one acre.

(2) *Site-specific stormwater submittal and planning requirements.*

a. *General provisions.*

1. Except as provided in subsection (b) of this section, a site-specific stormwater pollution prevention plan is required for all new development, redevelopment, residential, commercial and industrial developments that disturb one acre or more, and on sites that disturb less than one acre when the site is part of a larger development.

(i) For the purpose of this section, the area of the development must include all land of a common plan of development, regardless of the amount of land that will be affected by the specific development activity.

(ii) A stormwater pollution prevention plan is not required when a portion of a previously developed tract of land is redeveloped, unless the redevelopment will result in the conversion of more than one acre from a porous surface to an impervious surface.

2. The stormwater pollution prevention plan must be prepared at the time of submission of the NOI or construction site notice.

3. The plan must include an erosion and sediment control plan that describes the implementation of best management practices (BMPs), which will be used to reduce the pollutants in stormwater discharges associated with construction and post-development runoff.

4. A site-specific erosion and sediment control plan is required for all new development, redevelopment, residential, commercial and industrial developments that disturbs 5,000 square feet or more. Minimum requirements for the ESCP can be found in subsection (h)(3)b.2. of this section or in the construction general permit.

5. Implementation of the pollution control measures detailed in the SWP3 and ESCP is required. Inspection of the status of the pollution control measures will be performed by city personnel, during normal construction inspections and at other times when construction activities may be conducted.

6. These documents may be delivered to the director either in person or by mailing it to:

   Stormwater Management Division

   City of Texarkana, Texas

   220 Texas Blvd.

   Texarkana, Texas 75501

b. *Development of sites one acre or more.*

1. A stormwater pollution prevention plan is required for all construction projects where one or more acres will be disturbed during development. Developments of sites that disturb one acre or more within the city limits must prepare a stormwater pollution prevention plan that satisfies EPA or TCEQ regulations and the NPDES or TPDES construction general permit.

2. A copy of the stormwater pollution prevention plan, including the ESCP, must be provided to the city's director upon request.

3. A copy of the notice of intent (NOI) (sites greater than five acres) and/or construction site notice (sites one to five acres) provided to EPA or TCEQ must be provided to the director at least 48 hours prior to any land disturbing activity.

4. If relevant information provided in the NOI changes, a notice of change (NOC) must be prepared and implemented in accordance with the requirements of the construction general permit or any individual or group TPDES permit issued for stormwater discharges from the facility or construction site. A copy of the NOC must be provided to the director within 14 days of discovery of the change.

5. A copy of the approved TCEQ TPDES permit.

6. Prior to the submittal of a notice of termination (NOT), the operator of the construction site shall first notify the director to request an inspection of the construction site for approval of final stabilization. After final inspection approval, the operator of the construction site shall submit to the TCEQ and the director, a notice of termination (NOT) that includes the information required by part II section F of the construction general permit.

7. A copy of the notice of termination (NOT) if the current measures are insufficient or construction activity has been completed (sites greater than five acres) submitted to the EPA or the TCEQ must be provided to the director.

8. All projects under this category must meet the requirements in subsection (h)(3) of this section.

9. The area of the development will be based upon any or all of the following: platted lots, site plan of the development, phased-in name of the development and/or ownership of the property or, if not platted, based upon the area of the tract owned by the developer, including all contiguous property owned by the same person.

Disturbance of a partial area of a tract is not a condition that will cause a change of the category in development size.

c. *Development of sites less than one acre, if part of a larger development.*

1. All projects under this category must meet the requirements in subsections (h)(2)b. and (h)(3) of this section.

2. The area of the development will be based upon any or all of the following: platted lots, site plan of the development, phased-in name of the development and/or ownership of the property or, if not platted, based upon the area of the tract owned by the developer, including all contiguous property owned by the same person. Disturbance of a partial area of a tract is not a condition that will cause a change of the category in development size.

d. *Development of sites less than one acre, if not part of a larger development (special construction sites).*

1. An erosion and sediment control plan, as described in subsection (h)(3)b.2. of this section, is required for new development, redevelopment, commercial construction, industrial construction, multifamily residential construction and development of a residential subdivision within the city's jurisdictional area where 5,000 square feet of acreage will be disturbed, when the site is not part of a larger development of an acre or more. The area of the development will be based upon platted lots, site plan of the development, phased-in name of the development and/or ownership of the property or, if not platted, based upon the area of the tract owned by the developer, including all contiguous property owned by the same person.

2. Post on-site the copy of the construction site notice and city's stormwater permit.

3. Submit a copy of the site notice and ESCP plan prior to construction to the director.

4. Maintain ESCP on-site and inspect stormwater controls weekly.

5. Contractors are required to implement an erosion control plan that establishes best management practices (BMPs) to reduce runoff.

6. The erosion control plan may include any measures as required to comply with pollution control measures specified in subsection (h)(3)b.2. of this section.

(3) *Stormwater pollution prevention plan requirements (SWP3).*

a. *General provisions.*

1. A stormwater pollution prevention plan (SWP3), if required by subsection (h)(2) of this section, shall be submitted for review in accordance with NPDES or TPDES permit requirements and this chapter. Any operator desiring TPDES permit coverage shall submit to the director a stormwater permit application, on a form provided by the city stormwater management division, along with a copy of the SWP3 and/or the erosion and sediment control plan. Should the plan review process exceed ten business days, construction activities may commence under the submitted SWP3. Once the plan review is complete, any necessary changes will be made to the SWP3 at the project site. No building permit, subdivision approval, or permit to allow land disturbing activities shall be issued, until approval of this plan is obtained. The SWP3 must be developed to address discharges and potential sources of pollution, which may reasonably be expected to affect the quality of stormwater discharges associated with industrial, construction and development activities.

2. The stormwater pollution prevention plan (SWP3) shall describe and ensure the implementation of best management practices (BMPs) required by this chapter, which will be used to reduce the pollutants in stormwater discharges associated with construction and post-construction runoff, and ensure compliance with the terms and conditions of a TCEQ or EPA stormwater permit.

3. The city may deny approval of any building permit, certificate of occupancy, grading permit, subdivision plat, site development plan, permit to allow land disturbing activities or any other city approval necessary to commence or continue construction, or to assume occupancy, on the grounds that the management practices described in the plans or observed upon a site inspection by the city are determined not to control and reduce the discharge of sediment, silt, earth, soil and other materials associated with clearing, grading, excavation and other construction activities to the maximum extent practicable.

4. Qualified personnel (provided by the operator of the construction site) shall inspect disturbed areas of any construction site that have not been finally stabilized, areas used for storage of materials, including waste disposal that are exposed to precipitation, structural control measures and locations where vehicles enter or exit the site, concrete truck washout, etc. In accordance with the inspection schedule included in the stormwater pollution prevention plan (SWP3) for the site. All erosion and sediment control measures and other identified best management practices shall be observed in order to ensure that they are operating correctly and are effective in preventing significant impacts to receiving waters and the MS4. Based on the results of the inspection, best management practices shall be maintained, repaired or revised as appropriate, and as soon as is practicable and maintenance, repair or revision activities noted in the SWP3 for the site.

5. The city may require changes be made to an owner and/or operator's SWP3 if, in the best professional judgment of the director, the SWP3 does not comply with the requirements of the owner and/or operator's NPDES or TPDES permit or this chapter to discharge stormwater associated with construction activities.

6. The deficiencies in an owner and/or operator's SWP3 will be provided in writing, and the director will give the owner and/or operator a reasonable amount time, not to exceed 14 days, to make the necessary changes in the SWP3.

7. Any stormwater pollution prevention plan required by federal or state regulation shall be retained on site during all phases of construction and a copy must be submitted to the director. Failure to produce such required SWP3s shall be grounds for issuance of a SWO.

8. The director may request and receive in a timely fashion, at the time of or after application for a stormwater permit, a copy of any SWP3 required by federal or state regulation for discharge of stormwaters from a construction site. Failure to provide such requested pollution control plan within a timeframe specified by the director shall be grounds for a SWO.

9. The director may require additional information, plans or specifications to be provided in an SWP3 for a construction site if the director determines such additional information, plans or specifications are necessary to prevent the discharge of pollutants to the MS4 or waters of the United States.

10. The SWP3 must be prepared by a professional engineer licensed to practice in the state.

b. *Contents of the stormwater pollution prevention plan (SWP3).* The SWP3 must include, at a minimum, the information described below:

1. A site or project description, which includes the following information:

(i) A description of the nature of the construction activity;

(ii) A list of potential pollutants and their sources;

(iii) A description of the intended schedule or sequence of activities that will disturb soils for major portions of the site;

(iv) Description of the existing vegetation at the site, including coverage;

(v) The total number of acres of the entire property and the total number of acres where construction activities will occur, including off-site material storage areas, overburden and stockpiles of dirt and borrow areas that are authorized under the permittee's NOI;

(vi) Data describing the soil or the quality of any discharge from the site;

(vii) A map showing the general location of the site (e.g., a portion of a city or county map);

(viii) A detailed site map indicating the following:

A. Drainage patterns and approximate slopes anticipated after major grading activities;

B. Areas where soil disturbance will occur;

C. Locations of all major structural controls either planned or in place;

D. Locations where temporary or permanent stabilization practices are expected to be used;

E. Locations of construction support activities, including off-site activities, that are authorized under the permittee's NOI, including material, waste, borrow, fill or equipment storage areas;

F. Surface waters, including wetlands, either at, adjacent to or in close proximity to the site;

G. Locations where stormwater discharges from the site directly to a surface water body or a municipal separate storm sewer system; and

H. Vehicle wash areas.

Where the amount of information required to be included on the map would result in a single map being difficult to read and interpret, the operator shall develop a series of maps that collectively include the required information;

(ix) The location and description of support activities authorized under the permittee's NOI, including asphalt plants, concrete plants and other activities providing support to the construction site that is authorized under the construction general permit;

(x) The name of receiving waters at or near the site that may be disturbed or that may receive discharges from disturbed areas of the project;

(xi) A copy of this TPDES general permit; and

(xii) The notice of intent (NOI) and acknowledgement certificate for primary operators of large construction sites, and the site notice for small construction sites and for secondary operators of large construction sites.

2. Erosion and sediment control guidelines and plan requirements.

(i) *General description of best management practices (BMPs).* The responsible party of any construction site within the city shall implement measures necessary to control erosion, sedimentation, debris and stormwater pollution. The responsible party is responsible for the maintenance and performance of the temporary control measures until permanent measures are in place. The description must identify the general timing or sequence for implementation of BMPs relevant to each phase of site development such as, before clearing and grading activities begin, during all phases of construction and post-

construction/post development. At a minimum, the description must include the following components:

A. Erosion and sediment controls must be designed to retain sediment on-site to the extent practicable with consideration for local topography, soil type and rainfall;

B. Control measures must be properly selected, installed and maintained according to the manufacturer's or designer's specifications;

C. Controls must be developed to minimize the off-site transport of sediment, litter, construction debris and construction materials;

D. Ensuring that existing vegetation is preserved where feasible and that disturbed portions of the site are stabilized as soon as practicable in portions of the site where construction activities have temporarily or permanently ceased. Stabilization measures may include: temporary seeding, permanent seeding, mulching, geotextiles, sod stabilization, vegetative buffer strips, protection of trees, preservation of mature vegetation and other appropriate measures;

E. Final stabilization must be achieved prior to termination of permit coverage.

(ii) *Erosion and sediment control plan requirements.*

A. The ESCP shall include the following:

a) Project name;

b) Project type (residential, new development or redevelopment, commercial, industrial, road, etc.);

c) Project location;

d) Drainage plan;

e) Names and addresses of the developer, owner, surveyor, engineer, contractors, subcontractors and anyone else who will be responsible for project implementation;

f) Name of the individual responsible for long-term maintenance of the project. This includes a maintenance plan and schedule for all temporary and permanent stormwater practices;

g) A sequence of construction of the development site, including stripping and clearing; rough grading; construction of utilities, infrastructure and buildings; and final grading and landscaping. Sequencing shall identify the expected date on which clearing will begin, the estimated duration of exposure of cleared areas, areas of clearing, installation of temporary erosion and sediment control measures, dates when stabilization measures are initiated and establishment of permanent vegetation;

h) All erosion and sediment control measures necessary to meet the objectives of this chapter throughout all phases of construction and after completion of development of the site. Depending upon the complexity of the project, the drafting of intermediate plans may be required at the close of each season;

i) Seeding mixtures and rates, types of sod, method of seedbed preparation, expected seeding dates, type and rate of lime and fertilizer application and kind and quantity of mulching for both temporary and permanent vegetative control measures.

B. Construction phase control measures. Temporary control measures. The following includes, but is not an exhaustive list of examples of temporary pollution control measures that can be used to control erosion and sedimentation:

a) *Structural controls.*

i) Silt fences may be utilized, where necessary, to retain the sediments from disturbed areas within the site and decrease the velocity of sheet flows.

ii) Straw bales may be utilized, where necessary, to retain sediments from disturbed areas within the site and decrease the velocity of sheet flows. Straw bales are particularly useful in paved areas where silt fences cannot be erected.

iii) Stabilized construction entrances shall be designed to reduce the amount of soil tracked off the construction site by vehicles leaving the site. A stabilized construction entrance should be utilized, if necessary, to control tracking. The responsible party shall ensure that vehicles entering and leaving the construction site use the stabilized construction entrance. The owner or operator of a vehicle entering or leaving a construction site may not track soil off the construction site.

iv) Vegetative buffer strips, of appropriate size, should be maintained, where necessary and practical, to aid in reducing the velocity of stormwater and in trapping sediments in the stormwater leaving the site. A vegetative buffer will usually suffice as a structural control until final stabilization is accomplished.

v) Inlet protection barriers must be installed around all inlets until the area immediately surrounding the inlet is paved or stabilized.

b) *Waste controls.* Waste disposal must be accompanied in a manner so that no solid wastes, including building materials, hazardous substances, oil or packaging leave the site, except for disposal at an appropriate, approved solid waste management facility, in conformance with the Texas Solid Waste Disposal Act. To the extent practicable, no solid waste, including personal waste, building materials, hazardous substances or oil may be allowed to enter the city's municipal separate storm sewer system, the city's streets or the navigable waters of the United States. Building materials include, but are not limited to, uncovered stockpiles of soil, sand, dry cement, lumber, bricks, packaging or other products used in construction. The general contractor and/or builder, who are issued the building permit, are responsible for the conduct of all subcontractors with regards to disposal of wastes generated by the construction activities at the site.

c) *BMPs* . Soil stockpiles, or other BMPs installed, must be stabilized or covered at the end of each workday.

d) *Dust control.* Reasonable measures shall be taken to control dust, particulate matter and windblown debris.

e) *Hazardous material storage.* Chemicals, paints, solvents, fertilizers and other toxic materials must be stored in waterproof containers. Except during applications, the contents must be kept in trucks or in storage facilities. Runoff containing such materials shall be collected, removed from the site and disposed of at an approved solid waste or chemical disposal facility.

f) *Concrete trucks.* The responsible party may not allow the owner or operator of a concrete truck to wash out or discharge surplus concrete or drum wash water at a construction site, unless the surplus concrete or drum wash water in concrete trucks is discharged at a facility on the construction site that will retain all concrete wash waters or leachates, including any wash waters or leachates mixed with stormwater. Concrete wash waters and leachates may not be allowed to enter the municipal separate storm sewer system, city streets, the waters of the United States or groundwaters.

g) *General good housekeeping measures.* Providing general good housekeeping measures to prevent and contain spills of paints, solvents, fuels, septic waste and other hazardous chemicals and pollutants associated with construction, and to ensure proper cleanup and disposal of any such spills in compliance with state, federal and local requirements.

h) *Alternative procedures.* The responsible party may adopt alternative procedures, such as regularly scheduled street cleaning in the immediate vicinity of the construction site, instead of adopting temporary structural controls for erosion under subsection (h)(3)b.2.(ii)B.a) of this section. If alternative procedures are used, the responsible party shall include those provisions in its TPDES stormwater pollution prevention plan, erosion and sediment control plan or the plans submitted for a stormwater or building permit, if a TPDES stormwater pollution prevention plan is not required.

C. Timely maintenance of vegetation, erosion and sediment control measures and other best management practices, in good and effective operating condition. This includes applying effective stabilization measures for disturbed areas within 14 days when construction activities have temporarily or permanently ceased. Areas where construction activities will begin again within 21 days are not required to install stabilization measures.

a) Off-site runoff shall be safely diverted away from construction areas to the extent it is practical to do so;

b) Sanitary waste facilities shall be maintained so that they do not create a hazard to the environment. Sanitary facilities should not be placed over any paved surfaces;

c) Installation of structural measures during the construction process to control pollutants in stormwater discharges that will occur after construction operations have been completed. Structural measures should be placed on upland soils to the degree attainable. Such installed structural measures may include, but are not limited to, the following: stormwater detention structures, including wet ponds; stormwater retention structures; flow attenuation by use of open vegetative swales and natural depressions; other velocity dissipation devices; infiltration of runoff on site; and sequential systems which combine several practices. Operators of construction sites are responsible for the installation and maintenance of stormwater management measures prior to final stabilization of the site and are not responsible for maintenance after stormwater discharges associated with construction activity have terminated.

D. Final pollution control measures (post construction). These measures stabilize construction sites where either of the following conditions are met:

a) All soil disturbing activities at the site have been completed and a uniform (e.g., evenly distributed, without large bare areas) perennial vegetative cover with a density of 70 percent of the native background vegetative cover for the area has been established on all unpaved areas and areas not covered by permanent structures or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geotextiles) have been employed.

b) For individual lots in a residential construction site by either:

i) The homebuilder completing final stabilization as specified in subsection (h)(3)b.2.(ii)D. of this section; or

ii) The homebuilder of single-family homes establishing final stabilization for an individual lot by sodding the front yard with a vegetative cover with a minimum of 70 percent density (no bare spots) and installing a perimeter of sod for the remaining portions of the yard to prevent soil erosion.

c) For construction activities on land used for agricultural purposes (e.g., pipelines across crop or range land), final stabilization may be accomplished by returning the disturbed land to its preconstruction agricultural use. Areas disturbed that were not previously used for agricultural activities, such as buffer strips immediately adjacent to surface water and areas which are not being returned to their preconstruction agricultural use must meet the final stabilization conditions of subsection (h)(3)b.2.(ii)D. of this section.

d) Once final stabilization has been achieved, the responsible party shall notify the director of engineering, building official or designated representative that final stabilization has been achieved.

e) Erosion control structures must be provided where necessary to control erosive velocities in unlined channels or swales leaving the site.

f) Sediment traps must be provided on the site, as necessary, to control sedimentation from concentrated stormwater discharges into an environmentally sensitive area. Individual assessments must be made on a site-specific basis. However, a rock rubble low berm must be installed around an outfall that discharges directly into an environmentally sensitive area, unless this requirement is waived by the director of engineering because the responsible party has installed another type of sediment trap that provides equal or better protection.

E. Nonstructural control measures. The use of nonstructural stormwater treatment practices is encouraged in order to minimize the reliance on structural practices.

(4) *Post-construction control measures.*

a. On areas that undergo new development or redevelopment, site construction resulting in the disturbance of one acre or more total land area, post-construction control measures in the form of structural and/or nonstructural practices are required. A description of any measures that will be installed during the construction process to control pollutants in stormwater discharges that may occur after construction operations have been completed must be included in the SWP3 and/or ESCP. Permittees are only responsible for the installation and maintenance of stormwater management measures prior to final stabilization of the site or prior to submission of an NOT.

b. Post-construction phase control measures shall be incorporated to preserve predevelopment hydrologic regimes. Post-construction stormwater pollutant loading should

not exceed preconstruction pollutant loading. Preconstruction refers to the site immediately before the planned land disturbance and development activities occur.

c. Post-construction phase control measures include, but are not limited to:

1. *Velocity dissipation measures.*

(i) *On-site.*

A. Vegetated swales.

B. Check dams.

C. Vegetated filter strips.

(ii) *Off-site.*

A. Surrounding local topography.

B. Concrete-lined drainage channels.

2. *Predevelopment peak flow preservation.*

(i) *On-site.*

A. Detention basins/ponds.

B. Constructed wetlands.

C. Bioretention.

D. Wet basins.

(ii) *Off-site.*

A. In-line detention.

B. Outfall pump systems.

3. *Low impact development standards.*

(i) Minimization of the width or size of:

A. Roads/streets.

B. Sidewalks.

C. Cul-de-sacs.

D. Parking lots.

(ii) Open-space design.

(iii) Roof drainage control.

(5) *Maintenance requirements.*

a. All protective measures identified in the SWP3 and/or ESCP must be maintained in effective operating condition. If, through inspections or other means, the permittee determines that BMPs are not operating effectively, then the permittee shall perform maintenance as necessary to maintain the continued effectiveness of stormwater controls, and prior to the next rain event if feasible. If maintenance prior to the next anticipated storm event is impracticable, the reason shall be documented in the SWP3 and/or maintenance must be scheduled and accomplished as soon as practicable. Erosion and sediment controls that have been intentionally disabled, run-over, removed or otherwise rendered ineffective must be replaced or corrected immediately upon discovery.

b. The responsible party shall maintain and ensure adequate performance of the temporary pollution control measures, until permanent pollution control measures are in place.

c. Whenever the temporary or permanent pollution control measures do not keep soil, sediment and debris on the construction site, such as excessive tracking of dirt off site by vehicles and runoff of sediments from the site over sidewalks and into the streets and gutters, etc., the responsible party shall remove the soil, sediment and debris from streets, sidewalks and inlets, as necessary, return the soil and sediment to the areas to be stabilized and properly dispose of the debris. If the permittee does not own or operate the off-site conveyance, then the permittee must work with the owner or operator of the property to remove the sediment.

d. The responsible party is responsible for the maintenance of any permanent pollution control measures located on the site, unless the owner has dedicated the permanent pollution control measure to the city and has provided the city with any easements necessary to allow access to the permanent pollution control measure and to conduct any required maintenance activities.

e. Commitment of long-term maintenance of on-site post-construction control measures.

f. For new and significant redevelopment projects that require on-site control post-construction control measures such as detention ponds, constructed wetlands, bioretention systems, or the like, the developer shall be required to make a long-term commitment to the city for maintenance of the said control measures.

1. An affidavit, supplied by the city, signed by the developer, or the person who will be responsible for the maintenance of the control measures, must be submitted to the director no later than two calendar days after the date of termination of construction and will serve as a legal commitment to the city.

2. Once an affidavit has been submitted to the director, the director may require that a maintenance agreement be issued to ensure the maintenance is performed according to the said legal commitment.

(6) *Inspection of controls.*

a. The city shall make inspections as hereinafter required and either shall approve that portion of the work completed or shall notify the permittee wherein the work fails to comply with the SWP3 and/or erosion and sediment control plan as approved. Plans for grading, stripping, excavating and filling work bearing the stamp of approval of the city engineer, shall be maintained at the site during the progress of the work. To obtain inspections, the permittee shall notify the director at least two working days before the following:

1. Start of construction and installation of erosion and sediment control measures (all applicable BMPs).

2. Completion of final construction (final stabilization).

b. The contractor or responsible party shall inspect all pollution control measures every seven days (on a specifically defined day) and within 24 hours following a rainfall of five-tenths inches or greater at the site and maintain a record of each inspection.

c. Stabilized areas shall be inspected once every 30 days.

d. The inspection reports are to be considered part of the contractor's stormwater pollution plan (SWP3) and/or ESCP, and as such, are subject to the same record retention schedule and availability requirements of the SWP3.

e. The inspection reports, as well as the entire SWP3 and/or ESCP, shall be made available for inspection by a representative of the city during normal business hours.

(7) *Revisions/modifications.*

a. The permittee must revise or update the SWP3 and/or ESCP whenever the following occurs:

1. A change in design, construction, operation or maintenance that has a significant effect on the discharge of pollutants and that has not been previously addressed in the SWP3;

2. Changing site conditions based on updated plans and specifications, new operators, new areas of responsibility and changes in BMPs; or

3. Results of inspections or investigations by site operators, operators of a municipal separate storm sewer system receiving the discharge, authorized TCEQ personnel, or a federal, state or local agency approving sediment and erosion plans indicate the SWP3 is proving ineffective in eliminating or significantly minimizing pollutants in discharges authorized under this chapter or the construction general permit.

b. The SWP3 and/or ESCP shall accurately reflect site conditions and the construction activities proposed to be undertaken. Revisions necessary to maintain an accurate and up-to-date SWP3 and/or ESCP shall be made in a timely fashion, but in no case, later than two working days after the occurrence of conditions or activities requiring such revisions.

c. If the conditions or activities described by a SWP3 and/or ESCP revision could be reasonably expected to result in an increase in the actual or potential discharge of pollutants from the site, such revision must be approved by the director prior to implementation of the proposed revision at least two working days prior to the implementation of activities described by the revision.

d. The director shall have ten working days to approve or reject a revision to a stormwater pollution prevention plan or ESCP after submittal of a proposed revision. If the director does not issue an approval or rejection of the revision within the acceptable time frame, the revisions shall be assumed to be approved.

(8) *Violation.* It is a violation of this chapter if a discharge occurs from a construction site containing materials other than stormwater and such discharge and/or materials are allowed to accumulate within the MS4 and such accumulation persists for a period beyond three days, unless greater time is allowed by the director. This includes discharges of sediment, to include off-site tracking vehicles entering and exiting the site, paints, solvents, cleaners, windblown debris or other materials associated with the construction activity at the site.

(Code 1961, § 32A-14; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-64. - Spill or leak reporting and cleanup.

(a) Notwithstanding other requirements of law, as soon as any person responsible for a facility or operation, or responsible for emergency response for a facility or operation has information of any known or suspected release of materials which are resulting or may result in illegal discharges or pollutants discharging into stormwater, the storm drain system or waters of the United States, said person shall take all necessary steps to ensure the discovery, containment and cleanup of such release. In the event of such a release of hazardous materials, said person shall immediately notify emergency response agencies of the occurrence via emergency dispatch services. In the event of a release of nonhazardous materials, said person shall notify the authorized enforcement agency in person or by phone or facsimile no later than the next business day. Notifications in person or by phone shall be confirmed by written notice addressed and mailed to the city within three business days of the phone notice. If the discharge of prohibited materials emanates from a commercial or industrial establishment, the owner or operator of such establishment shall also retain an on-site written record of the discharge and the actions taken to prevent its recurrence. Such records shall be retained for at least three years.

(b) Notification shall not relieve the responsible person of any expense, loss, damage or other liability which may be incurred as a result of the release, including any liability for damage to the city, to natural resources or to any other person or property; nor shall such notification relieve the

responsible person of any fine, penalty or other liability which may be imposed pursuant to this chapter or to state or federal law.

(c) Spills or leaks of polluting substances discharged to or having the potential to be indirectly transported to the MS4 shall be contained, controlled, collected and removed promptly. All affected areas shall be restored to their preexisting condition. Any costs of the containment, control, collection, removal or restoration incurred by the city shall be reimbursed to the city by the person associated with the spill or leak.

(d) Any person operating a vehicle that causes or results in an accidental discharge or release to the MS4 shall be responsible to reimburse the city for any incurred costs resulting from any testing, containment, cleanup, abatement, removal and disposal of contamination.

(Code 1961, § 32A-15; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-65. - Citizen reports of violations.

(a) All citizens are encouraged to report to the city any spills, releases, illicit connections, other instances of anyone discharging pollutants into the MS4, and any other violation of this chapter of which they become aware.

(b) The city will designate an individual or office within the department of public works to receive all such citizen reports by telephone, in writing, and in person. A written record of each citizen report will be prepared and kept on file for a period of three years, and a copy of the city's record of the report will be furnished to the reporting citizen upon request. Also upon request, the city will inform the reporting citizen of any action undertaken by the city in response to the citizen's report.

(Code 1961, § 32A-16; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Secs. 125-66—125-88. - Reserved.

ARTICLE IV. - NUISANCES, RIGHT OF ENTRY, ENFORCEMENT AND APPEALS

Sec. 125-89. - Nuisances.

(a) An actual or threatened discharge to the MS4 that violates, or would violate, this chapter is hereby declared to be a nuisance.

(b) A line conveying sewage, or designed to convey sewage, that is connected to the MS4 is hereby declared to be a nuisance.

(c) Allowing accumulation of litter, yard waste or other solid waste to enter the MS4 is hereby declared to be a nuisance.

(d) Intentional acts causing damage to a temporary or permanent stormwater control measure is hereby declared to be a nuisance.

(Code 1961, § 32A-17; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-90. - Violations deemed a public nuisance.

In addition to the enforcement processes and penalties provided, any condition caused or permitted to exist in violation of any of the provisions of this chapter is a threat to public health, safety and welfare and is declared and deemed a nuisance, and may be summarily abated or restored at the violator's expense, and/or a civil action to abate, enjoin or otherwise compel the cessation of such nuisance may be taken.

(Code 1961, § 32A-18; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-91. - Administrative enforcement remedies.

(a) Notification of violation. When the director finds that any person has violated, or continues to violate, any provision of this chapter, or any order issued hereunder, the city may serve upon that person a written notice of violation. Within ten days of the receipt of this notice, the alleged violator shall submit to the director in writing:

(1) An explanation of the violation and a plan for the satisfactory correction and prevention of reoccurrence thereof, including specific required actions; or

(2) An explanation of any denial of a violation or any contention that no corrective action is necessary. Submission of an explanation or plan in no way relieves the alleged violator of liability for any violations occurring before or after receipt of the notice of violation.

Nothing in this section shall limit the authority of the city to take any action, including emergency action or any other enforcement action, without first issuing a notice of violation.

(b) Emergency cease and desist orders.

(1) When the director finds that any person has violated, or continues to violate, any provision of this chapter, or any order issued hereunder, or that the person's past violations are likely to recur, and that the person's violation has caused or contributed to an actual or threatened discharge to the MS4, waters of the state or waters of the United States which reasonably appears to present an imminent or substantial endangerment to the health or welfare of persons or to the environment, the director may issue an order to the violator directing it immediately cease and desist all such violations and directing the violator to:

a. Immediately comply with all subchapter requirements; and

b. Take such appropriate preventive action as may be needed to properly address a continuing or threatened violation, including immediately halting operations and terminating the discharge.

(2) Any person notified of an emergency order directed to it under this section shall immediately comply and stop or eliminate its endangering discharge. In the event of a discharger's failure to immediately comply voluntarily with the emergency order, the director may take such steps as deemed necessary to prevent or minimize harm to the MS4, waters of the state or waters of the United States, or endangerment to persons or to the environment, including immediate termination of a facility's water supply, sewer connection or other municipal services. The city may allow the person to recommence its discharge when it has demonstrated to the satisfaction of the director that the period of endangerment has passed, unless further termination proceedings are initiated against the discharger under this chapter. A person that is responsible, in whole or in part, for any discharge presenting imminent endangerment shall submit a detailed written statement to the director within five days of receipt of the emergency order, describing the causes of the harmful discharge and the measures taken to prevent any future occurrence. Issuance of an emergency cease and desist order shall not be a bar against, or a prerequisite for, taking any other action against the violator.

(c) Nuisance abatement.

(1) Unless specifically stated otherwise, any nuisance, as defined within this chapter, is hereby declared a nuisance if it exists within the corporate limits of the city or within 5,000 feet of such limits. The director may give notice to cease, abate, remove or otherwise remedy a nuisance immediately to:

a. The owner of property upon which a nuisance is located or from which a nuisance originated or is emanating. If the person creating, allowing or maintaining the nuisance is not the owner of the property, notice shall also be given to such person.

b. Any person creating, allowing or maintaining a nuisance.

(2) The notice must be given:

a. Personally to the owner/person in writing; or

b. By letter addressed to the owner/person at the owner's/person's post office address and sent certified mail, return receipt requested. However, if personal or certified mail service cannot be obtained or the owner's/person's post office address is unknown, notice may be given:

1. By publication in a newspaper of general circulation within the city at least twice within ten consecutive days;

2. By posting the notice on or near the front door of each building on the property to which the nuisance relates; or

3. By posting the notice on a placard attached to a stake driven into the ground on the property to which the nuisance relates.

(3) The notice may order the owner/person to undertake and implement any appropriate action:

a. To remediate and/or abate any adverse effects of the nuisance upon the MS4, the waters of the state, the waters of the United States or any other aspect of the environment; and/or

b. To restore any part of the MS4, the waters of the state, the waters of the United States or any other aspect of the environment that has been harmed.

(4) Remediation, abatement and restoration action may include, but not be limited to:

a. Monitoring, assessing and evaluating the adverse effects and determination of the appropriate remediation, abatement and/or restoration action;

b. Confinement, removal, cleanup, treatment and disposal of any discharged or released pollution or contamination;

c. Prevention, minimization and/or mitigation of any damage to the public health, welfare or the environment that may result from the nuisance; and

d. Restoration or replacement of city property or natural resources damaged by the nuisance.

(d) The notice may direct that the remediation, abatement and/or restoration be accomplished on a specified compliance schedule and/or be completed within a specified period of time. An order issued under this section does not relieve the violator of liability for any violation, including any continuing violation.

(e) If the owner/person does not comply with the notice within ten days of service, the director may enter any public or private property containing the nuisance and do any work necessary to abate the nuisance, except the demolition of buildings.

(f) If the director deems immediate abatement of the nuisance is necessary to protect the environment or the public health, safety or welfare from an imminent and substantial endangerment, the director may, without complying with the notice provisions of this section or without waiting the ten-day period, enter the subject property and do, or cause to be done, any work necessary to abate the nuisance and remediate and restore the environment. After abating the nuisance, the director may inform the owner/person in a notice sent certified mail, return receipt requested, that if the owner/person commits another violation of the same kind or nature that poses a danger to the environment or to the public health and safety on or before the first anniversary date of the original notice, the city may without further notice correct the violation at the owner's expense and assess the expense against the owner's property.

(g) All costs incurred by the city to abate a nuisance and remediate and restore the environment, including the cost of giving notice as required, shall be initially paid by the city and charged to the owner of the property.

(h) To obtain a lien against the property, the director causing the abatement shall file a statement of expenses with the county clerk of the county. The lien statement shall state the name of the owner, if known, and the legal description of the property. The lien shall be security for the costs incurred and interest accruing at the rate of ten percent on the amount due from the date of payment by the city. The lien is inferior only to tax liens and liens for street improvements. A lien may not be filed against real estate protected by the homestead provisions of the state constitution.

(Code 1961, § 32A-19; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-92. - Administrative reconsideration and appeal.

(a) *Reconsideration.*

(1) Any person subject to an emergency cease and desist order under section 125-91(b) or a stop work order under section 125-61(f) may petition the city to reconsider the basis for the order within ten days of the affected person's notice of issuance of such an order.

(2) Failure to submit a timely written petition for reconsideration shall be deemed to be a waiver of any further right to administrative reconsideration or review of the order.

(3) In the petition, the petitioner must state the provisions of the order objected to, the reasons for the objections, any facts that are contested, the evidence that supports the petitioner's contest, any alternative terms of an order that the petitioner would accept and whether the petitioner requests a hearing on the petition.

(4) Any stop work order shall be stayed pending the city's reconsideration of the petition, unless the city expressly makes a written determination to the contrary. Any emergency cease and desist order under section 125-91(b) shall not be stayed pending the city's reconsideration, unless the city expressly and in writing stays the emergency order.

(5) Within 15 days of the submittal of a petition for reconsideration, the city shall either:

a. Grant the petition without hearing and withdraw or modify the order accordingly;

b. Deny the petition without hearing if the city determines no material issue of fact is raised; or

c. Set a hearing on the petition and provide the petitioner, or any authorized representative of the petitioner, with written notice of the hearing setting at least ten days prior to the hearing by either personal delivery or by registered or certified mail, return receipt requested.

(6) Hearing; director's report and recommendation; city order.

a. The director shall be the presiding officer at the hearing, have authority to issue notices in the name of the city requesting the attendance and testimony of witnesses and the production of evidence and shall receive evidence. The petitioner and the city are entitled to present oral and documentary evidence and to cross examine witnesses. Upon request and prepayment of the reasonable charges, a transcript or audio recording of the hearing shall be made available to the petitioner.

b. Within 30 days of the hearing, the director shall submit to the city, with a copy to the petitioner, a report of the hearing and recommendation to the city for action to be taken on the petition.

c. The city shall issue an order accepting, rejecting or modifying the director's report and recommendation and may issue further orders and directives as the city deems necessary and appropriate.

(b) *Appeal to city council.*

(1) Within ten days of the date of the city's order on the petition for reconsideration, the petitioner may appeal the city's order to the city council by filing a written appeal with the city secretary.

Failure to file a timely written appeal to the city secretary shall be deemed a waiver of further administrative review.

(2) In the written appeal, the appellant must state the provisions of the order objected to, the reasons for the objections, any determinations of the director or city that are contested, the evidence that supports the appellant's contest, any alternative terms or an order that the appellant would accept and whether the appellant requests an oral presentation on the appeal.

(3) Absent a resolution of the city council stating otherwise, the city's order shall not be stayed pending the appeal to the city council.

(4) The city shall place consideration of the appeal on an agenda for a city council meeting so that the appeal is considered within 30 days of the date of filing. The appellant shall be notified at least 15 days in advance of the date and time the city council will meet and consider the appeal. If requested in the written appeal, the appellant shall have the right to present oral argument to the city council. The city manager and director shall respond to the oral argument presented.

(5) The city council may issue a final decision on the appeal or may defer a final decision, until the next regularly scheduled city council meeting. The city council may also remand the appeal to the director to reopen the hearing and receive additional evidence.

(6) The appellant may challenge any final decision by the city council in a court of competent jurisdiction.

(Code 1961, § 32A-20; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-93. - Penalty.

(a) *Civil remedies.* Pursuant to Texas Local Government Code § 54.012(5), the provisions of subch. B of ch. 54 of the Texas Local Government Code are hereby implemented for any violation of this chapter, any such violation being classified by the Texas Penal Code as a Class C misdemeanor, so that the city may seek civil penalties and injunctive relief under the provisions of subch. B of ch. 54.

(b) *Criminal penalties.*

(1) Except as otherwise provided in this chapter, any person who has violated any provision of this chapter or any order issued hereunder, shall be strictly liable for such violation regardless of the presence or absence of a culpable mental state and shall, upon conviction, be subject to a fine of not more than $2,000.00 per violation, per day or any greater fine authorized by law. Each day, or portion of a day, for which a violation occurs shall constitute a separate violation.

(2) Any person who has knowingly made any false statement, representation or certification in any application, record, report, plan or other documentation filed, or required to be maintained, pursuant to this chapter or any order issued hereunder, or who has falsified, tampered with or knowingly rendered inaccurate any monitoring device or method required under this chapter shall, upon conviction, be subject to a fine of not more than $2,000.00 per violation, per day or any greater fine authorized by law. Each day, or portion of a day, for which a violation occurs shall constitute a separate violation.

(3) In determining the amount of any fine imposed hereunder, the court shall take into account all relevant circumstances, including, but not limited to, the extent of harm caused by the violation, the magnitude and duration of the violation, any economic benefit gained through the violation, corrective actions by the violator, the compliance history of the violator, the knowledge, intent, negligence or other state of mind of the violator and any other factor as justice requires.

(c) *Civil suit under the Texas Water Code.* Whenever it appears that a violation or threat of violation of any provision of Texas Water Code § 26.121, or any rule, permit or order of the Texas Water Commission, has occurred or is occurring within the jurisdiction of the city, exclusive of its extraterritorial jurisdiction, the city, in the same manner as the Texas Water Commission, may have a suit instituted in a state district court for the injunctive relief or civil penalties or both authorized in

Texas Water Code § 26.123(a), against the person who committed, or is committing, or threatening to commit, the violation. This power is exercised pursuant to Texas Water Code § 26.124. In any suit brought by the city under this subsection, the Texas Water Commission is a necessary and indispensable party.

(Code 1961, § 32A-21; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-94. - Right of entry.

(a) The director may enter premises or vehicles regulated by this chapter at all reasonable times, whenever it is necessary to make an inspection to enforce any of the provisions of this chapter, to inspect permits and records required by this chapter, to collect air, water, waste or wastewater samples, or whenever probable cause exists to believe that a violation of this chapter or other environmental laws exists on such premises.

(b) The director shall first present credentials and demand entry if the premises are occupied. If the premises are unoccupied, the director shall make a reasonable attempt to locate the owner or person in control of the premises and demand entry.

(c) Where premises have security measures in force which require proper identification and clearance before entry, the person in control of the premises shall make necessary arrangements with its security guards so that, upon presentation of suitable identification, the director or authorized representative will be permitted to enter without delay for the purpose of performing specific responsibilities.

(d) If entry is denied or if a person in control cannot be located, the director shall have every recourse provided by law to secure entry. Such recourse shall include the right to obtain a search warrant under the guidelines of the Texas Code of Criminal Procedure; and for the purposes of same, any person with enforcement authority under this chapter is hereby declared to be a health officer.

(Code 1961, § 32A-22; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-95. - Injunctive relief.

It shall be unlawful for any person to violate any provision or fail to comply with any of the requirements of this chapter. If a person has violated or continues to violate the provisions of this chapter, the city may petition for a preliminary or permanent injunction restraining the person from activities which would create further violations or compelling the person to perform abatement or remediation of the violation.

(Code 1961, § 32A-23; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-96. - Compensatory action.

In lieu of enforcement proceedings, penalties and remedies authorized by this chapter, the city may impose upon a violator, alternative compensatory actions, such as storm drain stenciling, attendance at compliance workshops, creek cleanup, etc.

(Code 1961, § 32A-24; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-97. - Criminal prosecution.

Any person that violates or continues to violate this chapter shall be liable to criminal prosecution to the fullest extent of the law and shall be subject to a criminal penalty of up to $2,000.00 per violation per

day as authorized by state law and section 125-93. The city may recover all attorneys' fees, court costs and other expenses associated with enforcement of this chapter, including sampling and monitoring expenses.

(Code 1961, § 32A-25; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-98. - Remedies nonexclusive.

The remedies provided for in this chapter are not exclusive of any other remedies that the city may have under state or federal law or other city ordinances. The city may take any, all or any combination of these actions against a violator at any time, regardless of timelines identified in this subchapter, to gain compliance with this chapter and any state or federal regulations. The city is empowered to take more than one enforcement action against any violator. These actions may be taken concurrently.

(Code 1961, § 32A-26; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-99. - Computing time periods.

When computing any period of time for any deadline as provided in this chapter, if the last day of the period so computed is a Saturday, Sunday or legal holiday, the period of time runs until the end of the next day which is not a Saturday, Sunday or legal holiday.

(Code 1961, § 32A-27; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

Sec. 125-100. - Adoption of ordinance.

The ordinance from which this chapter derives shall be in full force and effect January 1, 2013, after its final passage and adoption. All prior ordinances and parts of ordinances in conflict with this chapter are hereby repealed.

(Code 1961, § 32A-28; Ord. No. 092-2012, § 1(exh. A), 7-23-2012)

CITY OF
TEXARKANA

Stormwater Guidelines for Contractors/Developers/Engineers:

Permit

Permits must be obtained before any land disturbing activities occur. Listed below will be considered land disturbing activities. In essence, a permit **WILL** be required before any soil is disturbed.

1. Smoothing
2. Clearing
3. Removing trees/vegetation
4. Reshaping land
5. Modifying drainage patterns or facilities
6. Removing, replacing, expanding, altering, destroying, or demolishing existing structures or facilities
7. Preparing land for any type of construction

Inspections

Inspections will be required. Contractor must notify city to obtain inspections.

1. One at beginning of project after all erosion control measures are installed
2. One for final approval
3. City may inspect throughout project

Construction Sites

1. Large Sites
    a. Disturbance of 5 acre or more
    b. Disturbance of less than 5 acres that is part of common plan of development if the plan of development will disturb 5 acres or more
2. Small Site
    a. Disturbance of 1 acre and less than 5 acres
    b. Disturbance of less than 1 acre that is part of common plan of development if the plan of development will disturb 1 to 5 acres
3. Special Site
    a. Disturbance of 5,000 sq. ft. of land that is not part of common plan of development

Common Plan of Development – area of development will be based on any or all of the following:

1. Platted lots
2. Site plan of development
3. Phased-in name of development
4. Area of tract owned by developer including all contiguous property owned by the same person

Construction Site Requirements

1. Large Sites
    a. SW3P and ESCP is required and must be submitted to City for Approval along with permit application
    b. Submit copy of NOI (Large Sites Only) and/or Construction Site Notice (post copies on site as well as City Permit Application)
    c. Submit NOC if relevant information changes in NOI
    d. Copy of approved TCEQ TPDES permit
    e. Maintain SW3P, ESCP onsite and inspect weekly

2. Small Sites
    a. SW3P and ESCP is required and must be submitted to City for Approval along with permit application
    b. Submit Construction Site Notice (post copy on site as well as City Permit Application)
    c. Submit NOC if relevant information changes in NOI
    d. Copy of approved TCEQ TPDES permit
    e. Maintain SW3P, ESCP onsite and inspect weekly

3. Special Sites
    a. Submit ESCP and application for approval
    b. Post City Permit Application on site
    c. Maintain ESCP onsite and inspect weekly

SW3P and ESCP must be signed off by a Professional Engineer in the State of Texas.

Refer to Sheets 37-40 of Stormwater Ordinance for examples of BMP's for construction sites.

Final Stabilization of Project:

- When 70% of cover has been established on all unpaved areas and areas not covered by permanent structures.

- For individual lots in residential, same as stated above or by sodding front yard with 70% cover and installing perimeter sod for remaining portions of yard to prevent soil erosion

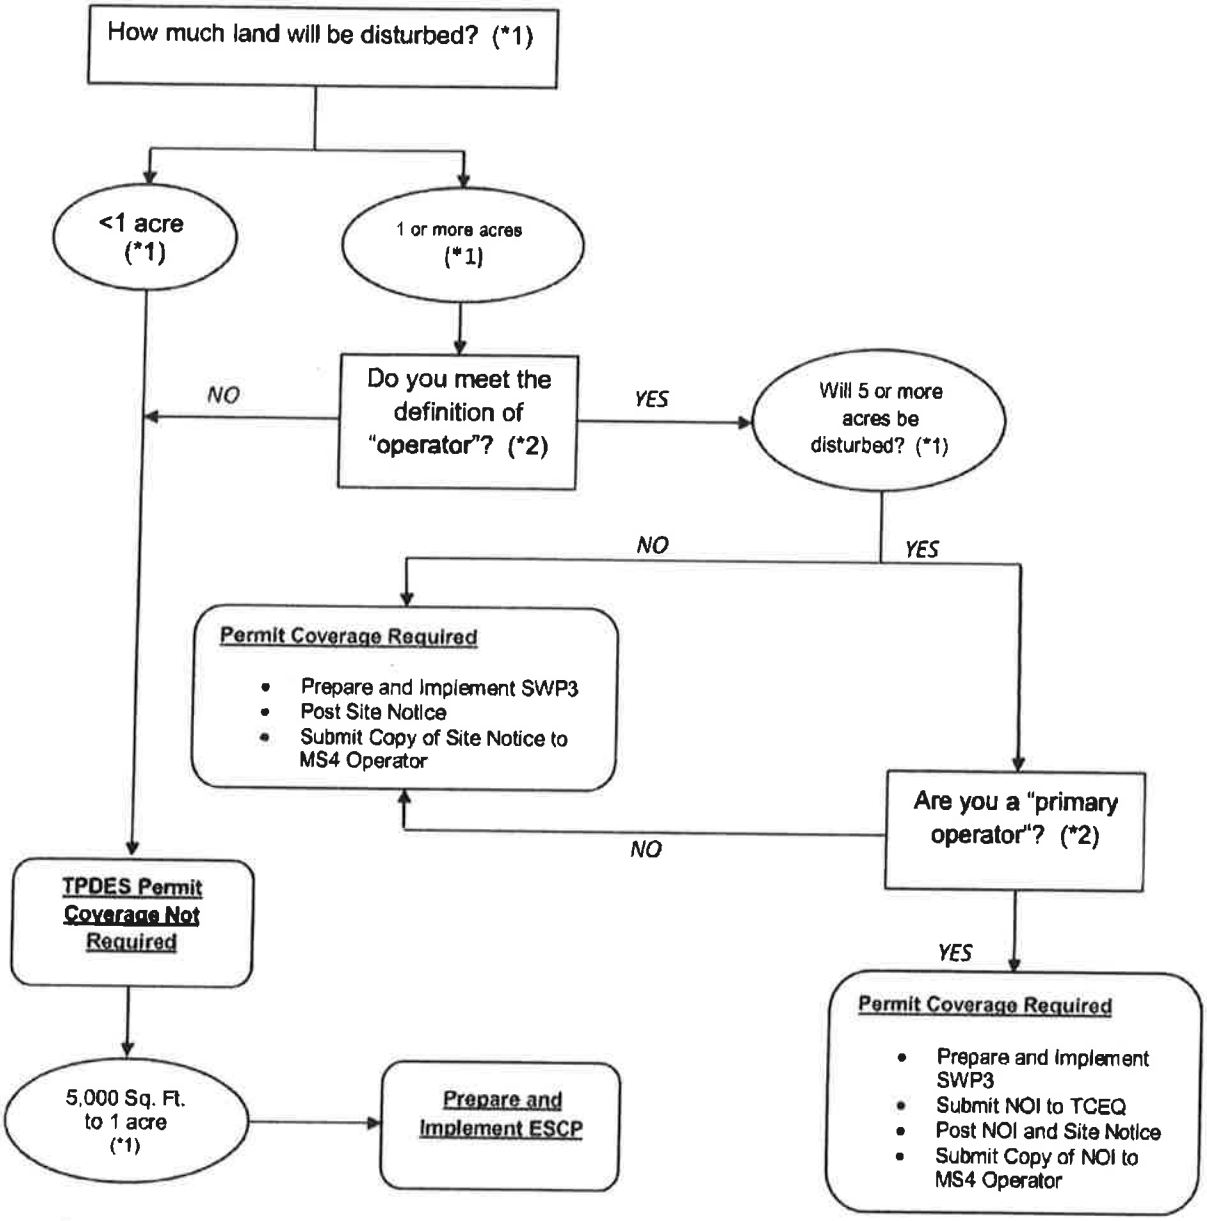
There are checklists and permit applications on the website.

If you have any questions, please give us a call at 903-798-3948.

Dusty Henslee, P.E. CFM.
Stormwater Engineer

ARE YOUR CONSTRUCTION ACTIVITIES REGULATED?

Flow Chart to Determine Stormwater Permit Coverage Requirements



ESCP – Erosion and Sediment Control Plan
SWP3 – Stormwater Pollution Prevention Plan
**** Stormwater Permit Application required for all projects disturbing 5,000 sq. ft. or more***
(*1) To determine the size of the construction project, use the size of the entire area to be disturbed, and include the size of the larger common plan of development or sale, if the project is part of a larger project (refer to Part I.B., "definitions," for an explanation of "larger common plan of development or sale").
(*2) Refer to the definitions for "operator", "primary operator", and "secondary operator" in Part I., Section B of the Construction General Permit TXR150000.

STORMWATER POLLUTION PREVENTION PLAN CHECKLIST

(prior to starting any projects)

Permit Application	City of Texarkana, TX Stormwater Permit Application Completed	☐
	SITE / PROJECT DESCRIPTION	
Project Description	Nature of Construction Activity	☐
	List of potential pollutants and their sources	☐
	Construction Schedule and Phasing i. Detailed Description of Construction Activities ii. Project Start/End Construction Dates	☐
	Description of Existing Vegetation of Site	☐
	Total number of acres of entire property	☐
	Total number of acres of disturbed area	☐
	Existing and Proposed Runoff Coefficient	☐
	Owner/Developer and Engineer Information	☐
	Primary Operator Information	☐
	Soil Data	☐
	General location map	☐
	North Arrow and Scale	☐
(Detailed Site Map- include in Project Description)	Existing features i. Parcels ii. ROW/Easements iii. Utilities iv. Pavement v. Buildings vi. Fences vii. Trees, etc. viii. Contours (min. 2 foot) ix. Stormwater Systems	☐
	Proposed features i. Utilities ii. Pavement iii. Buildings iv. Contours (min. 2 foot)/Drainage Arrows v. Stormwater Systems	☐

Revised: 7/6/2015

	Project Limits	☐
	Permanent Structural Controls i. Design Calculations	☐
	Temporary Erosion/Sediment Controls	☐
	Stabilization Practices i. Type of grass ii. Mixtures and Rates iii. Methods	☐
	Locations of concrete wash areas, waste/borrow areas, storage yards, vehicle wash areas	☐
	Surface waters including wetlands and 100 year floodplain	☐
	Stormwater discharges from site to surface water body or MS4	☐
Project Description-cont'd	Location of batch plants, asphalt plants, concrete plants, and other activities providing support to the construction site that is authorized under the construction general permit	☐
	Name of any receiving water (and segment number) at or near the site that may be disturbed or may receive discharges from the disturbed areas of the project	☐
	EROSION & SEDIMENT CONTROL PLAN (ESCP)	
Develop and Implement ESCP	Develop an Erosion and Sediment Control Plan to control erosion, sedimentation, debris, and stormwater pollution. ***Refer to ESCP Checklist for minimum requirements.*** Implement Best Management Practices (BMPs).	☐
	POST CONSTRUCTION	
Description of Post Construction Measures	Description of any measures that will be installed during the construction process to control pollutants in stormwater discharges that may occur after construction operations have been completed.	☐
	MAINTENANCE	
Develop Maintenance Plan	Description of maintenance activities for temporary and permanent pollution control measures. Responsible party for long term maintenance.	☐
	INSPECTION OF CONTROLS	
Inspection Reports	Submit a copy of Inspection Form to be used for inspections of control measures. Maintain inspection reports with SWP3 (as they are considered part of this plan).	☐
	REVISIONS/MODIFICATIONS	
Revise or update SWP3	Make revisions and update SWP3 to keep the plan current and accurately reflect site conditions and construction activities proposed to be undertaken.	

*Refer to Ordinance Chpt. 125-63 for specific requirements.
